LOOP HIGHWAY PROJECT PASSED BY COMMITTEE

Revised Bill Puts Responsibility Directly At Door of Mayor and City Council

92 FEET WIDE ARTERY NEW SPECIFICATION

Cost Placed at \$30,000,000 With 10 Per Cent Added to Tax Levy, Report Indicates

Considerably revised plans for a loop highway in downtown Boston, under which authority to decide when and where construction is to take and where construction is to take place is vested in the Mayor of Bos-ton, and permission to raise \$30,000,-000 in 20-year bonds is given, were reported favorably today by the Legislature's Committees on Metropolitan Affairs and Municipal Finance.

The highway is to circle Boston's congested areas, from the Charles River Dam to the junction of Albany Street and Broadway.

In a poll of the committee today, 16 voted for the bill, one against, two reserved their rights, one de-clined to vote, and 10 have yet to

vote. Sixteen votes, however, are enough to give the bill a favorable report.
To finance the highway, not only is \$30,000,000 to come from a bond issue, but 10 per cent must be raised

for tax levy.

The committee came to its declsion, a member said today, because in the past it has been unable to dis-cover Mayor Nichol's exact views on the highway issue and this revised bill was framed in order to place the entire responsibility on his shoulders. Although it will be the Mayor's duty to decide between alternate routes and to order con-struction in the method of financing and in other matters the consent of the city council is required.

the city council is required.

According to the terms of the bill, the highway is to be built by the Boston board of street commissioners, and they are given authority to construct all or such part of the highway as may be approved by the Mayor to be laid out, widened, relocated, and reconstructed, providing that within three years after the passage of the act he shall have approved some plan for a continuous highway, made up of connecting parts described in the bill.

ad, near the North Station, and Railroad, near the North Station, and the alternative of going by elevated ramp or tunnel from the vicinity of Fort Hill Square to Kneeland and Scouts, Girl Scouts, Girl Scouts, in a program of

Railroad to Causeway Street, along rrimac Street to Haymarket uare or along Causeway Street and Beverley Street to Washington Street North or both routes; along the general line of Cooper, Stillman and Ferry Streets, or along the general line of Cross Street or along the general line of Endicott, North Center and John Streets, to Commer cial Street or by such other route between said points as the Mayor may approve; from Commercial Street along territory within 800 feet of Atlantic Avenue at State Street to Fort Hill Square; on the surface, by tunnel, or by elevated from Fort Hill quare ramp to the corner of Knee nd and Albany Streets; along Al bany Street to Broadway, and be-tween Curve Street and Broadway, rebuild bridges over the Boston & Albany Railroad and the New York, New Haven & Hartford Railroad; to a point near the intersection of olumbus Avenue near Berkeley

Other Changes

As adjuncts to the main highway escribed above, the mayor may order constructed any one or more of the following street improvements:
(1) A connection between the main highway and Haymarket Square, or between the main highway (if it follows the line of Cross Street) and Washington Street North, opposite Beverly Street, or both.

(2) A widening of Broad Street etween the main highway and

CIVIL LIBERTIES PLEA PUBLISHED

Letter Asking Mayor's Stand on Free Speech

Protesting against the "interference of city officials with the right of free speech and public assemblage as guaranteed by the State and Federal Constitutions," John S. Codman, repesenting a group of prominent Bos ton citizens, today made public a let-ter to Mayor Nichols, dated April 13, asking the Mayor to state his position with respect to this practice, and to which, Mr. Codman says, no reply has been received. Mr. Codman is a member of the national committee of the Civil Liberties Association.

Signed by Moorfield Storey, Law-rence G. Brooks, Eugene N. Foss, James P. Munroe, George R. Nutter, Richard W. Hale, P. R. Frothingham, Samuel M. Crothers, George W. Coleman, George E. Roewer, and Mr. Codman, the letter to Mayor Nichols reads as follows:

"Within the last few years a practice has grown up among city offi-cials of preventing proposed public meetings in Boston which, because of their supposed purpose or their sponsors, have not met with official

"We had assumed that when you became mayor this arbitrary interwith free speech and free assemblage would cease. We have therefore, been surprised and dis-turbed that, during your recent absence in New York City, other cases

of interference with public meetings by city officials have occurred.

"Nine of us who present this matter to you are doing so because of any special interest in common with action of the city. We are, however greatly interested in the maintenance of our constitutional right of free speech as a principle of orderly progress and are deeply concerned over the arbitrary actions of city officials.

"We now appeal to you as the Mayor of Boston to place yourself on record as opposed to any further interference by city officials with the right of free speech and public assemblage as guaranteed by the state and federal constitutions."

CHICAGO MAYOR DEFENDS POLICE WORK FOR CITY

Objects to Charge of Mr. Olson That Enforcement Had No Chance There

BREWERIES CLOSED. HE DECLARES, BY HIS MEN

Federal Officer Lax, He Alleges, Until He Told Him He'd Seek Help in Washington

Special from Monitor Bureau WASHINGTON, April 22-William E. Dever, Mayor of Chicago, Ill., appeared before the special Senate committee conducting a hearing on prohibition and declared his purpos to be the "vindication of the great city of Chicago."

He had not completed his testimony when the committee recessed

lowing day.
Up to adjournment, Mayor Dever's statements had consisted mostly of charges against his administration said to have a vote upon his find-made by Edwin A. Olson, United ings. We cannot agree that such is States attorney, Chicago.

Mr. Olson had appeared before the committee several days previous as a dry witness. Mr. Dever appeared on wet time. He stated, however, that he was not a witness for "either wets or drys."

Both sides had exhausted their original 24 hours of hearing time when the committee recessed. There remained a three-hour extension to each that the committee had agreed

upon at an executive conference.

Mayor Dever began by referring to

read in the papers, extracts from the speech, and they were false, and what was to be expected from this source," replied Mr. Dever. "This is the second time certain persons have appeared before Senate committees in efforts to malign Chicago and I

want to vindicate that great city. Senator Harreld and Senator Reed then read excerpts from the Olson statement, the former to prove that nothing improper had been spoken and the latter to substantiate Mayor Dever's accusation.

"Well, which is to be believed?"
Mayor Dever asked. "Now regardess of what he said, let me answer these false charges.'

"If you don't know anything about

Chosen to Clean Up City

"I was chosen by a large majority because of my greater experience in public service," Mr. Dever said. "My able opponent was a young man and not as well known. I was elected by a nonpartisan vote. When I was made mayor I chose for chief of police, a man who had a great record as a policeman. I neither asked nor knew what party he belonged to.

"We found that there were 15,000 to 20,000 places selling liquor. I called in judges, the district attorney and county officials in an effort to clean up conditions. I also called in Mr. Olson. I told him 'Your office hasn't done a lick' and asked for his co-'Mr. Olson did not respond as I

thought he ought to have responded So I said, 'Very well, Mr. Olson, I shall go to Washington. I will put this matter up to President Coolidge Instantly he responded. He assured me of his help. He isn't a bad man. I make no charges against him. He is just the victim of political circum-Mr. Olson said that the federal au-

thorities closed 15 outlaw breweries. The Chicago police closed them up. When I took office we found that 60 per cent of the Chicago police were in the liquor business. We called in 11 captains and told them either resign or we will file charges against you. Every one resigned. "I gave the press a statement one

morning that, regardless of what I thought about prohibition, I intended to enforce it, and the very next day these breweries were closed. They these breweries were closed. They were closed by the Chicago Police Department and they were padlocked by the federal authorities on the evidence secured by us. Everything ac-complished in that office was done by the Chicago Police Departm yet they come down here and tell

Not Interested in Fight Senator Harreld: "We are not in-terested in this fight, we want to know if the law is being enforced or

is enforceable?"
Mr. Dever: "I have a letter here from an assistant of Mr. Olson, who tries cases while he is out making

Senator Gillett: "I don't see how we can receive that letter. Senator Reed has objected to allowing sworn statements being accepted." Senator Harreld: "What you are

trying to show here is that, while he is claiming credit for enforcing the law, you were doing so."
Mayor Dever: "Not at all."
Senator Harreld: "Here is a letter

which proposes to contradict Mr. Olson by a person he has made no charges against."

Mayor Dever: "Well, I won't press the matter, This letter commends

SUGAR SUPPLIES TO BE CUT DOWN

Plan Increasing Cost

By Cable from Monitor Bureau LONDON, April 22—International agar speculators by cutting off supsugar speculators by cutting off sup-plies at the source, according to the Daily Herald, are preparing to in-crease the cost of this commodity to British and American housewives and candy manufacturers. The consumption of sugar in the United Kingdom is 83.2 pounds per capita annually. "The British planters of tea and rubber, in league with the financiers and middlemen at home," says the Herald, "have cut down the growth of the commodities in their control; so Uncle Sam is going to etort with a reduction of the growth of sugar under his control."
Of 2,121,321 tons of raw and re-

fined sugar imported into the United Kingdom in 1925, by far the largest proportion came from Cuba and San Domingo and is controlled by American capital. The paper says that two powerful international banking groups in New York this year negotiated with the Cuban sugar trust to "discrurage overproduction and to prevent price depression or fluctuation by buying and holding large stocks of sugar when prices are 'below the cost of production.'

Beet sugar is not likely to help the consumer, it is said, unless the sources of the cane sugar supply are increased in the British West Indies or in Java. The British sugar experts, Willet and Gray, estimate the world's production of beet sugar this year at 8,287,000 tons, or half that of cane sugar.

AMERICAN METHODS APPROVED BY LABOR and cannot cultivate the soil.

Visit to United States

By Cable from Monitor Bureau LONDON, April 22—The report by William Mosses, formerly general secretary of the Federation of Engineering and Shipbuilding Trades, and one of the British Labor representatives, recently sent to America by the Daily Mail, is published here

It dwells upon the attractions the United States offers to the worker, and attributes them chiefly to the facts that in America "everything that mechanical ingenuity can dethat mechanical ingenuity can qevise" is used to ease the human factor in industry, that the "job is
brought to the man instead of the
man going to the job," that piece
work prevails and that as a rule the
American worker is "free-from the
abominable doctrine of class consciouspeas and class hared."

sciousness and class hatred.' In this connection, Sir Douglas Hogg, the attorney-general, said that Americans have "found out the right method of increasing production and reducing costs, and by doing so have encouraged in the home market an increasing demand for goods which has enabled them to extend the principle of mass production, and thereby lower the costs and capture the

EXCHANGE WEAKNESS

PARIS, April 22 (P)—The weakness of French exchange has been much discussed during the last few days in political circles, particularly among the leaders of the Radical-Socialist majority in the Chamber of Deputies, who show a disposition to throw part of the responsibility on the case of Austria and Hungary, or possibly by Bulgaria in the London market on her own credit."

The appeal bears the signatures of Capt. E. N. Bennett, Sir Graham Bower, the Dowager Lady Boyle, Mrs. L. Cobham, Capt. C. F. Dixon Johnson, Sir John Foster Fraser, Dr. Ernest H. Griffin, Sir John Prescott Hewatt, and Archaegon Bergsford throw part of the responsibility on the Government. This has revived Hewett, and Archdeacon Beresford eports that the Radicals and Socialists are getting ready to move against the Premier, Aristide Briand, with the object of setting up another Cabinet under Edquard Her-riot, the Radical chief.

It is expected the issue will come up only after the Chamber reconvenes in June, the present session being devoted exclusively to the PASTESTESTESTESTESTESTE

voting of the budget, after which most of the deputies and senators will go to their respective departments to attend the meetings of the general departmental councils. The decline of the franc is still attributed

QUAKERS CARRY AID TO REFUGEES

British and American Societies Engaged in Ministering to Macedonians

By Special Cable

SOFIA, April 22-Representatives of the Quakers in America and the Society of Friends in England, who have taken up the problem of feeding the Macedonian refugees, have just arrived here and have given The Christian Science Monitor represen-tative a distressing picture of the condition of the exiles. Elsie Lange, who was the representative of the American Quakers during the relief work in Germany, said that during the trip through the refugee area with her colleague, Miss Nancy Brunton, she saw in Philippopolis 27 families crowded in a big hut; in another city she saw 15 families living in one large room. Miss Lange and Miss Brunton saw

the refugee population in a tour of 40 cities and villages on their way "The successful handling of here. the refugee problem by the Govern-ment is absolutely impossible," said the former. "With the best wishes in the world, the Government has not funds to carry out a comprehensive plan of relief and rehabilitation. The Government has already done all it could do. It has distributed land among the refugees, but they lack implements and animals

"We are convinced that the Reparations Commission ought to grant British Delegate Reports on Bulgaria a moratorium of at least two years, pending the solution of the grave refugee problem. Two years is a sufficient period to enable he Government to make the refugee a productive element of society Reparations can wait, pending solution of this pressing problem Bulgaria cannot solve it for herself. She must have funds in large quanti-ties from abroad. Foreign loans are

"We have studied the refugees for the purpose of beginning a compre-hensive feeding scheme," continued Miss Lange. "We will furnish one meal a day to 1000 children; the nursing mother's regimen will also include two meat meals a week of

thick, nourishing soup. "Our aim is to save lives. The American Quakers and the English Friends are acting jointly in this

Special from Monitor Bureau LONDON, April 22-In order to problem of the refugees, the Near and Middle East associations have ssued an appeal urging "that the solution of this problem is crucial, oth from a humanitarian and political standpoint and it can only be found in the issue of a loan to Bulgaria. It is understood that the Reparations Commission would not object to such a loan, which might be raised on an international basis as LAID TO M. BRIAND was done in the case of Austria and

QUATRIEME

Cushions for Summer of Gay Chintzes, Linens and Toiles

Cushions of silk or velvet, however admirable in themselves and in their season, become : . . shall one say? . . . anachronistic in summer. For the verandah, the garden, the country house living room, bright chintz, hand-blocked linen and toile cushions are far more appropriate and more chic. And they may be as various in color and design as one could wish for any setting. Au Quatrieme has seen to that! They are down cushions, of course, covered with our own special Chintz Room materials, not to be found elsewhere. And because we are able to use ends and short pieces, the prices are moderate indeed.

Among them one will find cushions of those delightful Fortuny printed muslins in Renaissance designs, that so amusingly counterfeit old damamusingly counterfeit old dam-ask, and that are such a find for the Spanish of Italian country house. Hosts of French and English chintzes, percales and hand-blocked linens in all the brightly flowered and chinoiserie patterns that belong especially to porch and garden. Belgian linens in their cool checks and stripes, in unusual blues and mauves and amaranth reds. Fresh sprigged checked ginghams with crisp pleated ruffles. All the bold

Martine linens in the fashionable modernist manner . in special cylindrical and oval shapes, or made double to hang over a chair back . . . taped or fringed. And very beautiful and unusual cushions of needlework panels . . . reproductions of Jacobean crewel work . . mounted on linen and interestingly taped in contrasting color. They are to be had in a charming mauve-blue, rose and green, and are a real trouvaille for English country houses. Most of these cushions range from \$4 to \$12. The crewel work examples are \$20. PROBLEM LINKED WITH POLITICS

Fin Com" Head Blames Political Ambitions for Present Conditions

Contending that the Department of Public Works has sufficient authority to compel public service corpora-tions and contractors to restore to to the efforts of the United Improve-ment Association to obtain effective street: repairs instead of makeshift work which, it asserts, has too often

been done.

Mr. Carr said further that in his through more careful attention to street repairing, particularly by fol-lowing the course recommended by the United Improvement Association of always completing a fill-in by ping it solidly, rather than waiting for the street to settle. He suged also that in view of the prob able \$32 tax rate for Boston, Mayor ols might find this a channel for substantial economy, and a means of perhaps reducing the tax rate appreciably.

"The Public Works Department,"
Mr. Carr explained, "should make the iblic service corporations and the city contractors understand that their ids will be forfeited if they don't leave the streets in as good order as find them. It must also see to it that its own water division puts back the street pavement in the same shape it found it. The water divi-sion, as the United Improvement Association indicated, is probably the chief offender in laxity of street

"This is an old story and it's one that should be told for the last time. Conditions here, so far as Boston's streets are concerned, can be made 75 per cent better by doing away with that antiquated system of filling holes in streets and allowing them to

tamp the earth dug out back when the work is done and then pave the surface so that it will be usable till a permanent surface can be put on. We've talked this matter over with different public works commissioners. They all knew that they had law enough to call upon to make the concerns opening the streets put them back in the same condition they found them and do all this a great deal more promptly than had been

This isn't nearly so much a mechanical and chemical matter as it is one in which politics is the leading element. Political ambitions prevent commissioners of public works enforcing the laws. There have been administrations under which the commissioners could not compel their own department forces to make any speed. Politics is always an element, or has been, to take into account in solving Boston's street problems. Excuses, and that's all they are, are invented to account for a system that costs thousands of dollars yearly, that continues from

year to year rolling up additional thousands to be paid as the penalty. "Just because a thing has existed for a long time is no reason why it need continue. The contractors must give bond when they open a street. while the public service corpora-tions are always under bond and neither could get away from their

Haverhill Shop Told Special Pact Must End June 30

HAVERHILL, Mass., April 22 (Special)—The trial agreement be-tween the B. E. Cole, Inc., shoe man-ufacturing concern and its employees, sanctioned by the Shoe Workers' Protective Union, which has been in effect since the begin-ning of the year, will cease to have the approval of the union after June 30, the firm has been notified by the

charles L. Carr, chairman of the Boston Finance Commission, added today the support of his commission council in January. Provision was made that the agreement should be on trial six months, subject to renewal for one year if satisfactory to both parties.

Under the special agreement be pinion several hundred thousand tween the firm and its crew all mat-ollars could be saved to the city ters of price and working conditions through more careful attention to have been adjusted without the street repairing, particularly by fol-medium of the union officials or manufacturers' association. Full recognition is accorded the union but union interference in the busi-ness is allowed only when the firm and shop committees cannot agree.

Members of the firm believe that

the continued operation of the agree-ment would add benefits to both parties but the union is indisposed to renew it. Many adjustments have been made under it and it was be lieved that it was working eminently satisfactory to all concerned. Union officials decline to discuss the merits or demerits of the pact or to give reasons why they object to its con-

HOME BEAUTIFUL SHOW OFFERS BUDGET PRIZES

Prizes of \$20 each for budgets based on various salaries for various sized families will be included in those offered at the Home Beautiful and Building Trades Exposition, to be held in Mechanics Building, May 1 to 8. The first budget must be based on a salary of \$30 per week with a family of two adults and one child; the second budget must be based on a salary of \$40 a week with a family of four, allowing for two adults and two children, and the third budget must be based on a salary of \$50, allowing for a family of two adults and three children. The budgets must be reckoned on market prices prevailing during the week of April 17 to 23.

Budgets must be received at the executive offices of the Home Beautiful Exposition, 329 Park Square Building. Awards will be made on the closing day of the exposition. Prizes of \$10 and \$5 will be awarded in two classes for breadmaking. One class will consist of children under 16 years of age, and the other class will consist of persons over this age. The first prize in each class will be \$10, and the second prize \$5. A \$25 prize will be awarded for the best work in home handicraft accomplished during spare time.

CITIES SERVICE "GAS"

Reserve Bank Head Directing Campaign for \$40,000 Fund

SETTLEMENT HOUSE

Work carried on by the Elizabeth Peabody House on Charles Street is an important feature of the Americanization program in Boston and should receive the support of the people of the city, W. P. G. Harding, governor of the Federal Reserve Bank, told a gathering of men and women, guests of Mrs. Bernard W. Trafford of Milton, at the Chilton Club this afternoon.

He said that there was increasing need in the city for that work which equaints newcomers to the United States living in the West End with American customs and ideals, helps them to adjust themselves to the new onditions confronting them, meet the requirements, live up to the standards and become, eventually, substantial citizens.

portunities for social intercourse, dramatic work and so on, and that

Broome, Superintendent more than 1577 volunteer workers of Schools in Philadelphia, Pa., have given to it of their time. chairman of the commission on the curriculum of the department of superintendence of the National Education Association, is to speak on Wednesday afternoon on the the nation-wide interest in the curriculum.

The first preliminary reports on curriculum revision in Massachusetts will be made by the seven subcommittees conducting the several subjects under the direction of the steering committee, of which John J. Desmond of Chicopee is chairman. The others on the committee are Oscar C. Gallagher of Brookline, Charles F. Prior of Fairhaven and Mattapoisett, Zenos W. Scott of Springfield and Frank W. Wright, director of elementary and secondary education and normal schools.

While the committees were pointed only a year ago, and it will take them from three to five years to complete their work, enough has been accomplished to make an important contribution to the subject. Whatever recommendations they may make will be put into operation as an experiment contributing

them.

Figures from the postal department were presented to show that the three-foot unit, used as a basis of comparison, which carries an average of 1500 pounds of papers, costs the post office \$15.75, paid to railroads, for a 50-mile haul seven days a week. The average charge for the same weight and haulage by the post office to newspapers is \$286.

It was pointed out that the publishers have diverted from the mails all bundles to dealers, except where other carriers were not available Under the new rates, the postal committee of the association said it would pledge a return of millions of pounds of newspapers annually to the mails.

The report also urges that the Postal Department make use of 500,-00 miles of hard roads with their extra carriers to aid the movemen of the mails, which it was believed would lessen postal shipping cost and expedite service for short hauls.

Trend to Trade Pursuits Shown, but Homemaking Continues in Lead

ST. LOUIS, Mo., April 22 (Special) —Girls like to take a hand in me-chanics, it was stated at a session of the second day of the National Scout Council here by Miss Sarah Louise Arnold of Simmons College, Boston, president, who reported on a special study of the preference of girls for

In trending toward mechanical pursuits, said Miss Arnold, the girls are not drifting away from domestic tastes. As evidence of this she made formal announcement that more than 26,000 girls had been awarded homemaking badges within the last year. In commenting on this feature of her report, Miss Arnold said:

Girl Scouts choose the badges for which they work, and it is a significant commentary on the taste of the girl who becomes a Scout that the cook's badge came first. Nor do the Girl Scouts disdain the homely task of washing and ironing. The laundress badge was second only to the cook's in popularity in the homemaking group. The social graces are not overlocked, for the hostess badge was won by nearly 4000.

PARTIES READY FOR BIG RALLIES

Republicans and Democrats to Get "Inside" of National 1926 Contest Tonight

Campaign announcements of importance and "keynoting" of the significant issues of the 1926 contest are expected tonight, when leaders of both the Republican and Demo

ers of both the Republican and Democratic Parties come to Boston in the first big political rally of the year.

In the American House, Democrats from all over the State will listen eagerly to a probable presidential candidate, Albert J. Ritchie, Governor of Maryland, and to David I. Walsh, formerly Democratic Senator of Massachusetts, while William M. Butler, Senator from Massachusetts; Governor Fuller, Irvine L. Lenroot, Senator from Wisconsin; Hanford MacNider, Assistant Secretary of War, and others will enunciate Republican doctrines to a Symphony Hall audience.

Look to Governor

Before the evening is over, Governor Fuller is expected to announce that he will be a candidate to succeed himself, and David I. Walsh will ceed himself, and David I. Waish with probably let his candidacy for the United States Senate be known. Whether Joseph W. Ely of Westfield or Col. William A. Gaston of Boston will be the Democratic standard bearer for the gubernatorial office may be settled by public announce

Ritchie said today Governor Democrats all over the country ex pect great things from Massachusetts this year. In Maryland we take it for granted that David I. Walsh will be the candidate for United States Senator, and that he will be elected easily. This feeling is based largely on his showing in the last presidential campaign, when he polled such a magnificent vote in spite of Presidential campaign.

ernor said. He traced the continual addition of authority to the Federal Government which has taken place in the last century and said the State's prerogatives had been Governor enforcement of prohibitory laws should be left to individual states. He believed that only in the decentralization of authority among the states could the most democratic

government be obtained. The Governor paid a courtesy visit to Governor Fuller and the State House this morning. He expressed the wish that Governor Fuller might visit him in Maryland and the usual reetings were interchanged between the two executives. Governor Ritchie was presented to several members of the Governor's Council and to members of the Executive

At Symphony Hall Republicans have reserved 1250 places at the ban-

The Republican delegation from Washington arrived today, and service men greeted Mr. MacNider, while a reception committee of Swedishmericans met Senator Lenroot. The

cratic guests will be entertained by several groups. Governor Ritchie will be the guest of the Women's Democratic Club at the Copley-Plaza this afternoon at 4 o'clock, will speak at the City Club early this evening, will visit Governor Fuller tomorrow, and be enter-tained by the Democratic State Committee at lunch tomorrow.

Borneo Wonder Mystery Deepens

Puzzled Experts Scent Plot or Something-Perhaps Fourth Dimension

The Borneo basket mystery has not been solved at Peabody Museum at Social Service was the youngest passengers from six different poprts, Harvard as officials were inclined to member of his academic family, it at the same pier, and possibly the think yesterday it had. If Tuesday ing impression upon American life. was the baskets' day to stop whirling as they had whirled since October last, then Wednesday was their day to take up that whirling again, just as if nothing had happened, and to continue it blithely to the investitive dismay of Harvard and Technology experts alike who, hoping that a consensus would help to solve the mystery, were putting to practical test the ancient saying that in unity there is strength.

Perhaps in the end it will be

upon a cellar patrol which discon-nected the vibrations that had been

New experiments are being tried to find out, if possible, what extraneous factor is governing this dance of the baskets, but so far they have remained unproductive of any conclusive proof. The case in which the baskets are contained is airtight. The baskets are impervious to the perplexities they are causing. They whirl and whirl and their whirling has no end in sight.

During

for the day, opened this morning's program with prayer, and following music by the choir. Dean Athearn and Dr. Marsh delivered addresses. **Advises Graduate Study**

Dean Athearn reminded the students and their friends of the rapid growth of the school, and pointed out to the seniors the advantages to be gained in graduate work. He characterized the function of education as "the liberation of personality," and went on to say that the acquisition of a baccalaureate degree represented a minimum of vocational preparation and a maximum of development of personality. "How-ever," he continued, "the vocation of graduates of this school is educa-tion, and the academic training is for them vocational training."

In introducing Dr. Marsh formally

Motor Traffic Shows Increase

Governor's Square Had 57,-750 Cars in Day-45 P. C. Carried But One Person

Automobile traffic at Governor's Square, said to be the busiest intersection in Boston, increased 5 per cent since last year, according to a traffic count just completed by the Committee on Municipal and Metropolitan Affairs of the Boston Cham-ber of Commerce. The count showed that in one day 57,750 vehicles passed through the square between 8 a. m. and midnight, compared with 55,000 that were shown in the cham-

year.
Traffic is particularly difficult at chamber, because there are fully 25 different directions and turns which traffic may take on approaching the intersection from the five different streets that run into the square. The count revealed many interesting

HARVARD LAW PRIZE AWARDED

BANKS WIN SUITS ON STOCK DEALS

Master Holds Pledges Made by Burroughs Were His at the Time

Attorney Arthur Black, sitting as master in several suits in which plaintiffs who sold stocks through George Burroughs, formerly a specialist in real estate stocks in the firm of Burroughs & Co., sought to recover from banks holding their stocks, has found in favor of the banks. The banks received the stocks evenues, at 10 a. m., April 27.

Seven reels of motion pictures are them to cover his own indebtedness.

The master's report discloses a phase of stock manipulation which authorities who have made a study of brokerage conditions say obtains largely among brokerage houses, but which Massachusetts has not sufficient legislation to control for the protection of stock purchasers.

Mr. Black, in the suit of Augustus Loring and Moses Williams as executors of Ellen G. Bacon, against the State Street Trust Company, Old Colony Trust Company, and L. Cushing Goodhue as administrator of the estate of George Burroughs, relates how the plaintiffs, deciding to sell 30 shares of Boston Real Estate Trust, par \$1000, had their clerk, on June 10, 1925, arrange the sale with Mr. Burroughs, whose reputation was excellent and with whom they had traded many years. Their clerk provided the clerk for Mr. Burroughs with the certificate, with blank power of attorney and with probate papers. It was agreed the stock ought to be split up for sale because of the large par.

Mr. Burroughs presented the certificate to the transfer agents and received six certificates of five shares each issued in the name of Burroughs & Co., and he then indorsed them in blank to the trust companies in substitution for securities previously pledged for value reshares and sent the price agreed upon to the plaintiffs. Shortly afterward he passed on, without delivery hold the 30 shares. The plaintiffs seek recovery of the 10 shares they have not been paid for.

The master finds that "the plaintiffs gave Mr. Burroughs no authority to pledge the stock for his own benefit, but it is perfectly clear they portunity and all the documentary Mr. Barnes said the bill before aids to commit this very breach of Congress was drawn by the National faith, The transfer agent had no

In the equity suit of Harold J. Coolidge against Mr. Goodhue as administrator and against the Old Colony Trust Company to recover the shares of University Associates alleged to have been wrongfully pledged by Mr. Burroughs to the bank, the master says that Mr. Coolidge, desiring the purchase of this stock, made an agreement with Mr. Burroughs whereby the latter was to secure the stock and to sell it to Mr. Coolidge at \$75 a share "and no questions asked." The master finds that on April 28 Mr. Burroughs sent DECLARED SOUND word he had secured 90 shares at \$75 a share. On April 29 Mr. Coolidge sent Mr. Burroughs a check for \$6750, with which the latter pur-

chased the stock. The master finds the hanks met every requirement, custom, and busi-SPRINGFIELD, Mass., April 22 ness prudence; that Mr. Burroughs at this time Mr. Coolidge had not Potato prices have broken all re- given Mr. Burroughs the name or stock to the bank, the legal title to it

SAFE FARMING. PLEA FOR TEXAS

Diversification and End to Speculation in Cotton Growing Advocated

DALLAS, Tex., April 11 (Special Correspondence) — The great increase in population of the southwest during the last five years, accompanied by what might be termed an industrial awakening first notice. able in manufacturing, distribution and transportation, is extending to the cotton growing, it is indicated by numerous campaigns now under way to bring about a higher yield per acre, production of finer staple and a lowering of the cost of pro-

Sponsored by the bankers of the State, newspapers and agricultural publications, a movement toward education for a "safe farming program" is being promoted in every part of the State, and by a number of organizations whose objects are mainly more cotton on fewer acres, more feed on more acres and the diversification and rotation of crops.

Foremost among the organizations intent upon changing Texas cotton farming from a speculation to a sound industry is the Texas Safe Farming Association. One hundred officials, representing all parts of the State are activated at the contract of the state are activated at the safe and the safe are activated as the safe are activa State, are actively at work spreading information and education intended to advance the industry in which one-half of the population of the State is engaged, the value of which is 50 per cent greater annually than all of the other 45 or more crops of Texas combined.

Texas combined.

Actual reduction of the quantity of cotton produced is not the primary object of the general movement, although full realization would doubtless bring that about incidentally. It is perhaps fitting that the association should have been organized by a group of Texans, most of whom are engaged in the banking whom are engaged in the banking business, as the bulk of the cotton crop is financed by the country banks.

Its aims are to avert the possibility of conditions which have often attended either the production of a bumper crop for which the price is below the cost of production, or the failure of the crop when the farmer is speculating on cotton, not only for his year's profits but to pay for his supplies, for which he has usually given a mortgage on his stock and farming implements or on the farm

"Returns from the 4,000,000-bale crop produced in Texas last year will not cover the cost of production," Nathan Adams, president of one of the largest banks in the State and one of the organizers of the assembled to the companion of the second to the se ciation, said. "I am not an alarmist, but we cannot stand another such year as 1925 without heavy business

"We cannot control acreage; we can only advise. There might be a greater yield this year even on maller acreage. Pests and weather re factors which we cannot control, but we can raise our own food and feed. We cannot prosper by fol-lowing the old practice of cotton credit farming to buy everything

The State is producing from 35 to 42 per cent of the entire cotton crop of the United States and from 20 to 30 per cent of the world's supply.

SOUTH DAKOTA'S GOLD OUTPUT WAS \$6,000,000

Correspondence) — Otto Ellerman, state mine inspector, has reported to Governor Carl Gunderson that the gold output in South Dakota during 1925 was valued at approximately \$6,000,000 and that since gold has been discovered \$261,900,000 has been roduced in the hills.

Gold is South Dakota's most im

portant mineral product the value of all other minerals mined in the State during 1925 exceeds \$500,000. The gold quarries of the State are becoming more important each year, Mr. Ellerman reported, and this is also true of the coal mines. The tin, tungsten and lead silver mines remained idle while the mica and lithia properties show an increase. The indications for 1926 are that several idle mines will again become

A PLAIN STATEMENT OF FACT

To the Millions who will Buy Tires in the Next Few Weeks

When a great company knows within itself that it has accomplished something outstanding, it has a duty to the public, to its past customers, and to itself, to let that fact be known.

So we make this statement: that there is more mileage in Goodrich Silvertown Cords this year than in any tires this company has ever built.

To have surpassed all previous standards of excellence is an accomplishment. For Silvertowns have always been the sum total of tire excellence.

This accomplishment is one of patience and careful attention to small things - small things which make a tremendous total. It is based, not on the introduction of any revolutionary new principle, but upon consistent improvement in the tire which has already proved itself "best in the long run."

With full realization that the word involves comparison, we pronounce the present Goodrich Silvertowns the finest tires ever made by Goodrich; finest in design and construction.

This statement is made with the knowledge that our files in Akron contain many letters from past users - motorists who have secured 15,000 -25,000-35,000 miles from individual tires and sets of tires in pre-

To you who are now considering the purchase of tires, we urge that you consult the Goodrich dealer and let him apply the Silvertowns best designed for your personal motoring requirements.

Audio Amplifier Not Only Cause of Tone Distortion

Discussion of Detectors by Albert F. Murray Shows Poor Quality Often Caused by Rectification Methods

With this article we introduce a newcomer to our readers, Albert F. With this article we introduce a newcomer to our readers, Albert F. Murray, one of the most capable of our younger radio engineers. He graduated from Maryville College with an A.B. in 1915, specializing in mathematics. He obtained a degree of S.B. in E.E. from the Massachusetts Institute of Technology in 1918, and completed the radio commercial course at Harvard in the same year. He was then commissioned a first licutenant in the Army Air Service and made head of the radio department of the United States School of Military Aeronautics at M. I. T. At the close of the war he became research engineer with the Hammond Radio Research Laboratories in Cambridge, Mass. From there he went to the General Radio Company as assistant chief engineer. Then he joined John Hays Hammond Jr., taking charge of his "radio control" research work. He recently completed his duties there, and nove is in charge of

work. He recently completed his duties there, and now is in charge of production work with the Wireless Specialty Apparatus Company.

Great emphasis is usually laid upon the effect of audio amplification on the quality of reproduction, but the effect of detector distortion, dealt with in this article, has received, up to the present, but little consideration. In the Hurd interpretation of the B-D receiver described in our issues of March 15 and 25 an effort is made to open the question of needed improvement in detection as the possible source of much distortion that has been blamed on our audio amplifiers. Mr. Murray takes this question up from an engineering viewpoint. We feel this is most timely, and that during the coming year much of what is outlined here will have become commercial practice.

Many improvements are brought use, when receiving frequencies in the radiocast band, from .00025 to .0005 MF. This value should be increased to .002 MF for the second. shout in this radio world of ours by experimenters who are not contented to do things as they are usually done. As we know, new paths and short-cuts are often found by straying away from the ordinary herd. The fact that we are very prone to follow the leader is evidence for interesting the straying away from the ordinary herd. The fact that we are very prone to follow the leader is evidence of the leader is e enced, for instance, in the case of the arrangement of our vacuum detectors. As many as 95 per cent of us are using the condenser and grid leak arrangement, not realizing that another method, regeneration-controlling device to known as plate rectification, is su-perior for some uses. Regardless of perior for some uses. Regardless of annoy the operator. If too high a re-what scheme of detection is better sistance is used, a decrease in signal strength, accompanied by poor quality on fairly intense signals is noticed. On non-regenerative detecfor use in the reader's set, it will probably interest him to consider, from an engineering viewpoint, some of the whys and wherefores tors the value of the leak affects both quality and detector sensitivity. Ordiof detection, and to compare the relative advantages of the two methnarily the higher the resistance the greater the sensitivity on weak sigods of rectification (detection) nals, but the poorer the quality. It makes no difference in its action whether the leak is connected as

Why a Detector? This is a rather elementary question, and yet it is one that has puzzled many radiocast listeners. We need a detector, because it is a de-vice which enables us to obtain audio-frequency energy from the inwave. At the radiocasting station the speech frequencies are superim-posed on the radio-frequency wave by the functioning of some type of "modulator" (usually a vacuum tube), the process being termed "modulation." In order to hear these speech frequencies at the receiver, this process must be reversed, and the tube which does the "de-modulating" is our very necessary de-

If this de-modulating tube were missing and the received radio-frequency voltage applied directly to heard: for, as explained many, many in radio articles, the carrierwave frequency, which would prob-ably be in the neighborhood of positively. This is done, as in Fig. 1, 1,000,000 cycles a second, would be 1,000,000 cycles a second, would be unable to make the relatively low-period telephone diaphragm respond to the extremely rapid vibrations, if battery. The value of the positive indeed any of the high-frequency current could be forced through the high-impedance windings of the phones. But, feed this modulated 1,000,000-cycle energy into the input of a detector and from the output of a detector and from the output terminals you can take the desired audio-frequencies, which, ranging from, say 50 to 10,000 cycles, cause the telephones, or loudspeaker, to respond more or less faithfully. Let the state of the signal voltage to the grid causes a decrease in this current, the amount depending upon the value of the radio voltage.

respond more or less faithfully. Let us see how this detecting tube accomplishes this. As mentioned in the first paragraph, there are two modes of operation: grid rectification and plate rectification.

Grid Rectification

This is easily remembered as the grid condenser and leak method. The standard circuit is shown in Fig. 1. Because this circuit is so widely known and used, no description of it is given here. In order to bring to the radiocast listener in this short article the more important, but seldom mentioned, differences in detector action, it will be necessary to omit a discussion of the fundamentals of detector operation and to recommend to those interested, the speech frequency variations will be present in the plate circuit, together with the radio-frequency fluctuations. The low-frequency variations will be by-passed around the phones by the by-passed around the phones by the by-pass condenser C-3 in Fig. 1.

The outstanding difference in operation between grid rectification and plate rectification is that, in the first case, the plate current decreases upon the receipt of a signal, and in the latter, the incoming signal causes it to increase. This discussion will be continued in the next article.

article.

omit a discussion of the fundamentals of detector operation and to recommend to those interested, the explanation given in any good radio textbook, such as Morecroft, pages 440-467, or VanDerBijl, 315-339.

Happily, a knowledge of detector theory is not necessary to appreciate the more practical points that follow. In Fig. 1 the two things to notice are: (a) The presence of the grid condenser and leak. The capacity of the grid condenser should be sufficiently large so that no appreciable amount of received voltage is lost across its terminals, but, not so large that the quality of speech will be impaired by the inability of the leak to discharge the condenser promptly. These considerations limit the capacity of grid condensers we

in the administration of the decisions of this commission and the minimizing of interference from many causes outside wave conflict. third is the furthering of developent of the art in the interest of the listeners and of the industry. These last two functions are essentially administrative and in my view should rest in one of the executive departments rather than by creating a new and additional government agency. It would imply great additional ex-

pense.
"Boards and commissions by their divided authority have always been a failure in administration although they are desirable for discretionary or judicial determination. The tend ency to create independent agencies in the Government whose administrative functions are outside the control of the President is, I believe, thoroughly bad. I believe the staff of the department has performed a great service in development of the radio art and developing the method of control and regulation in a new field. So far as the Department of Commerce is concerned the extraordinary difficulties and conflicts in the situation are such that we will be well satisfied to see radio administered by any other department which can properly undertake its regula-

WOULD STOP PUPILS FROM ASKING RIDES

Payson Smith Urges Principals to Warn Children

Urging that an organized effort be made to deter school children from asking rides from passing motorists, Payson Smith, State Commissioner of Education, addressed the following letter to superintendents today: "I am writing to invite a concerted effort on the part of superintendents of schools throughout the Commonwealth to assist in eliminating a serious risk of highway travel. I refer particularly to the habit of

school children of asking rides from passing automobilists. "While we can sympathize with the desire of children to secure rides this authority. The White Bill now in this way, yet it should be made clear to them that there is very sethe House, gives the power. There rious menace in doing so. For the have been suggestions that this aupurpose of minimizing other dangers thority should be administered enthat are involved, I am suggesting that superintendents of schools, through notices sent to principals, teachers and to the homes, secure the co-operation of pupils in ending a dangerous practice."

WOMEN BOWLERS OPEN TOURNEY

Over 1300 Entries for International Congress at Milwaukee, Wis.

MILWAUKEE, Wis., April 22— Twelve booster teams started the competition in the ninth annual Women's International Bowling Congress here last night, a temporary lead being gained by the Island Yacht Club team

gained by the Island Yacht Club team with a score of 1827.

More than 1350 women are entered in the contest which will continue until May 10, teams coming from as far east as Jersey City, N. J., and Albany N. Y., and from as far west as Omaha, Neb., Kansas City, Kan. and Green Bay, Wis. Chicago is sending 26 squads, including the defending champions, the L. V. Estees Engineers, who have held the title for the last two years. Milwaukee has entered 71 booster fives and 53 regular teams. More than \$9000 is offered in prize money, the winning team to be prize money, the winning team to be twarded \$180 and medals.

awarded \$180 and medals.

Twenty-four more booster fives will bow this afternoon and tonight, the first regular lineups going on at 4:30 tomorrow afternoon. Tomorrow night teams from Racine and Fond Du Lac, Wis., South Bend, Ind., Akron, O., Flint, Mich., and Indianapolis, Ind., are scheduled. The first Detroit women to take par

The first Detroit women to take part in the competition will be Mrs. A. Hill and Mrs. Randolph, who will bowl together in the doubles event Monday morning. Monday night four Detroit teams, the Palace Recreation No. 1, Ferridale Improvement Association five, Stiener's Real Estate five, and the Northwestern Recreation five, will the Northwestern Recreation five, will put up their scores. The present hold-ers of the first 10 places are:

SIX major-league teams played their first games on their home grounds Wednesday—the Boston and Chicago National League clubs and the Philadelphia, New York, Cleveland and St. Louis American League teams. And they all won their games. Evidently the home crowds cheering for their teams add some encouragement to a team. Maybe it will start Pittsburgh on a fresh attempt for the pennant when the champions open at their home grounds.

grounds.

Possibly Manager S. R. Harris of Washington made a poor guess when he decided that Zachary and Mogridge, veterans, were losing their effectiveness, and allowed them to go. Harris, who has made himself famous by depending upon veteran pitching arms, and who has won a world championship and two league pennants by this policy, has himself evidently let two veterans go who might have been a help to his team this year. Zachary pitched the St. Louis Browns to a victory over Detroit yesterday, and allowed only six hits. Mogridge, in his first game for the Boston Braves, held Philadelphia to four hits and won, 2 to 1.

John M. Bentley, left-handed pitcher

and won, 2 to 1.

John M. Bentley, left-handed pitcher who was traded to Philadelphia by the Giants and has been playing first base for the Phillies because of his hitting ability, failed to hit safely Wednesday against Mogridge of the Braves. the first time he has gone without a hit in a game this season.

The list of players who have hit in every game this season. The list of players who have hit in every game this season has dwindled to eight. Dykes of the Athletics, Fournier of the Brooklyn Nationals, Combs and Meusel of the New York Americans, Joseph Harris of the Washington Americans and Spurgeon and Burns of the Cleveland Americans are the eight players who have made at least one hit in every game played to date. Bratchie of the Red Sox and Bentley of the Phillies were erased from the list Wednesday.

It looks natural to see Rogers Hornsby at the top of the National League batting averages. The St. Louis leader has made 14 hits in 32 times at bat for an average of .438 and his chances of again being in the .400 class are very bright.

J. W. Siagle '27 of Princeton University is not only a very valuable football player as shown by his work on the Tiger varsity last fall, but he is becoming a very valuable member of the Tiger baseball team. Yesterday he went to bat as a pinch hitter in the seventh inning of the game against Columbia with two men on bases. As a result his team came from behind and won the game, 10 to 7.

HAGEN IN FINE FORM

ST. PETERSBURG, Fia., April '22 (A)
—Walter C. Hagen, United States proposition; W. W. Lord '28, former Philips Andover Academy player, or John E. Tobin '27 at first base, and William to lips four the will east be second.

ONLY ONE VETERAN PITCHER AT UNION

Infield Is Most Promising Part of Nine

SCHENECTADY, N. Y., April 22—Union College opens its baseball schedule. April 30 with Colgate University at Hamilton and University of Rochester will be taken on at Rochester on May 1. Due to unfavorable conditions, outdoor practice has been greatly hampered and work has been practically limited to indoor practice. Particular stress is being laid on the development of the pitching staff, due to the ineligibility of R. J. Wellinghorst '27 and M. L. B. Hawes '28, veterans of last year. K. G. Maybe '27 will be the only veteran pitcher of last year, but he will be aided by Sigmund Makofski '26, who will be taken from the outfield. Maybe's best efforts were shown last year in the game against Hamilton, which the Garnet won with a score of 3 to 2. G. A. Stubbs '27, who attained varied success as a left-

a score of 3 to 2. G. A. Stubbs '27, who attained varied success as a left-handed pitcher in previous years, is again available and it is hoped that he will be able to take his regular turn in the box. Others who may do box duty for the Garnet this year include Paul Williams '28, W. L. Doty '27, A. W. Gotch '26 and W. L. Nelson '27 of last year's squad and W. K. Mott '28, Spencer Peets '29, H. L. Plerce Jr. '29, Barnes '29 and H. T. Jacobson '28.

Jacobson '28.

The infield seems to be the most encouraging to Coach Wittner, J. H. Ripton '26, G. M. Haber '27, and S. T. Hawkes '26, all veterans, are holding Hawkes '26, all veterans, are holding down third, short and second, respectively. E. J. Leifhelt '26, last year's substitute first baseman, will probably play that position, although H. C. Mitchell '29 is showing up very well. The other infielders include F. H. Mackie Jr. '27, J. F. Gribbon '26, Frank Zlerer '29 and Paul Schultze Jr. '28. J. M. O'Neill '27 and R. G. Hoehn '27

J. M. O'Neill '27 and R. G. Hoehn '27 of last year's outfield are available and the position in center left vacant by Makofski, who will do box duty, will be filled by either G. L. Van Curan '27, J. I. McDowell '29, or W. L. Davis '26.

The catching department claims both C. A. Bouteiller '27 and J. L. Lewis '28, who saw duty last year. In addition to these, J. E. Finnegan Jr. '28, a product of the interfraternity learne, will probably see service. league, will probably see service.

ATHLETES ARRIVE IN PHILADELPHIA

Over 500 Schools and Colleges Enter Penn Relays

for the University of Pennsylvania's thirty-second relay carnival at Franklin Field tomorrow and Saturday.

Officials announce that 524 schools and colleges will be represented, and that the entry list includes Olympic, intercollegiate, United States and world's champions. In view of the large number to compete in track and field divisions, 50 events will be started and concluded tomorrow.

The Occidental College team of Los Angeles reached Philadelphia late yesterday and went through a light workout on the field. Other teams arriving today expected to do likewise to work off travel stiffness.

For the first time in years the Intercollegiate Conference will be represented by a glittering array of performers, Universities of Chicago, Michigan, Wisconsin, Ohio State and Iowa have teams entered in the relays and in received events.

lows have teams entered in the relays and in special events. Two entries, Occidental and Oregon Aggies, represent he Pacific coast.

LOS ANGELES, April 22—In order to evelop a good punter for the Univer-ity of Southern California footbal

Harvard Diamond Material Is Good

Mitchell Turns Attention to Developing Confidence in Fielders

We have material available for much better team than last year, but there is a great deal of work to be done before the real strength of the squad is brought out." These were the words of Coach F. F. Mitchell of

However, when the Crimson team defeated Rhode Island State College in the second game of the season, 6 to 1, and Wesleyan in the third, 7 to 6, and westeyan in the third, 7 to 6, hopes for a successful year were revived. The defeat at the hands of Boston University could be laid to the lack of outdoor training because of poor weather conditions for the Crimson

squad is generally far along in training about this period.

The first game of its southern trip was played at Annapolis yesterday and the Crimson came from behind to win over the United States Naval Academy 14 to 6. This would seem to indicate that steady progress is being made by Coach Mitchell's players. So much attention has been turned to the pitching problem at Harvard during the past few seasons that the fielding has been more or less over-looked. Coach Mitchell pointed out that although pitching is and has been somewhat of a problem for the Crim-son, fielding is one of the biggest of problems at Cambridge just as it is

for every college team as a rule. Infield Is Important "If we could develop a fairly efficient infield, it can be easily seen that many of the hits made against our pitchers would be cut down," said Coach Mitchell.

Because of the poor weather Coach Mitchell's plans in regard to develop-ing more confidence in the individual player through the right kind of train-

the pitcher who has come up from the freshmen ranks to the varsity this year. He held the Navy runless ing the three innings he pitched yes-terday after relieving Booth. Mitchell also spoke highly of the way in which R. H. Booth '27 is progressing. Booth pitched well for the fresh-men two years ago and should be fully up to the standard of the good ollege pitcher this season. He allowed Rhode Island State only seven hits. The other pitchers on the present squad are R. W. Puffer '26, Solomon Andrews '27, F. B. Cutts '28, last year's elief pitcher in the freshmen squad. Booth, Puffer and Barbee will carry the brunt of the work this year. D. B. Linscott '28, last year's star freshmen pitcher, is on the probation list. Two Likely Catchers

The catching position is the least settled this season. There are three or four candidates, including Henry Chauncey '28, former Groton Academy player, and H. L. DeRham '27. These the Pacific coast.

Pennsylvania, Cornell, Princeton,
Georgetown, Boston College, Syracuse,

more experience. The former played a strong game nearly all last season, but failed to get into the Yale University game because he weakened along toward the end of the season. The team will play Catholic Univer-

PAULEN SAILS HOME; WILL RETURN TO U. S.

NEW YORK, April 22 (P)—Adrian Paulen of Holland, middle distance track star, has sailed for home with the promise that he will be back in America for the national championships at Philadelphia in July.

Before leaving yesterday he said that he is a much better runner than figures showed in his indoor appearfigures showed in his indoor appea ances here this winter.

Paulen started in an event at Mad son Square Garden 24 hours after I left the boat and finished next to las He had been advertised and kept faith with the promoters without having a chance to train on this side. In outdoor races out West recently he has been close to 48 seconds for the quarter-mile and believes he will at-

tain that speed when he returns for the nationals. HOCKEY MEN IN CHICAGO BOCKEY MEN IN CHICAGO

Special from Monitor Buresu

CHICAGO, April 22—Appointments were made, here, today, by the Executive Committee of the National Hockey League, the professional organization, for conferences with local hockey magnates regarding the award of a franchise for Chicago in the league next season. So many conflicting claims were made at the recent annual meeting of the league at Montreal by individuals who claimed to represent Chicago capital that the Executive Committee of the league, headed by President Frank Calder, decided to come here and interview the claimants at first hand.

CHICAGO NINE IS DEVELOPING

Coach N. H. Norgren Expects Maroon to Improve as Season Advances

done before the real strenght of the squad is brought out." These were the words of Coach F. F. Mitchell of Harvard University just before the Crimson squad left for its southern trip. He stated also that the first three games of the season had convinced him of the good possibilities possessed by the 1926 squad.

The defeat of the Harvard team by Boston University by the score of 8 to 6 in the first encounter of the season gave Harvard followers who were of a hopeful attitude a severe setback. However, when the Crimson team detection of the season can be seen to be seen to be season to be seen to be season to be seen to be seen to be seen to be season to be seen The Maroon coach also has a few valuable new reserves. At present the team looks fair in fielding, but does not show up as well at the bat as did the 1925 nine.

In the first championship game Chi-

cago lost to Northwestern University 12 to 5. Unsteadiness on the part of the Chicago pitcher was chiefly responsible for the defeat. In the second game Purdue University defeated the Maroons 6 to 2. Purdue made seven hits to 12 for Chicago; but the former's hits to 12 for Chicago; but the former's were well bunched in two innings, while Chicago's were scattered. In addition Chicago made five errors as against three for the winners.

Coach Norgren is depending upon the development of the veterans in all-round play for improvement in the team's showing as the season advances. In the catching department, especially, J. R. Webster '26, regular backstop, is showing a gain in expe-

backstop, is showing a gain in experience. He is performing his mechanical functions better and is holding the team together in exciting moments He has capable understudies in C. W Hoerger '28 and J. S. Perlstein '28. Cunningham Is Missed

In batting the Maroons are not ex pecting so much because they miss the timely hitting of W. R. Cunningham '26, former first baseman, and the 25, former first baseman, and the pace-setting bat work of J. R. Howell '25, center fielder, as well as the other Howell, R. N. '25, shortstop. Hoerger, who is to play center field regularly because of his fielding and throwing ability as well as his batting, is expected to fill part of the attacking deficiency caused by the loss of these

only two were made both in the in batting. He was second on the team game when his team makes errors in back of him no matter how good he is," said Mitchell. Therefore it is not surprising that he should devote just as much time to developing fielding as pitching, if not more.

Coach Mitchell 30.

C. L. Brignall '27, third he are the season for Chicago. Season with an average of 324 on batting. He was second on the team last season with an average of 324 on batting. More than 3000 athletes from all sections of the United States were scheduled to arrive here throughout the day for the University of Pennsylvania's thirty-second relay carnival at Frank-

consistently.

In the pitching department chief reliance again is being placed on J. E. Gubbins '26, recently elected captain. Gubbins, the only dependable left-hander on the staff, won 5 and lost 2 hander on the stan, won a and lost a of his games last season. He struck out 41 batsmen, equaling the best record of the league. He allowed only 37 hits to 184 who faced him.

Marks also is pitching well. The lat-ter depends mostly on his speed and change of pace to lure the batters into easily fielded outs and does not try for the strikeouts of which Gubbins makes

however.

Macklind has plenty of help at first base with J. J. McDonough '28, football end and basketball guard, workball end and basketball guard gua ing there capably, Edwin Schneberger '28, alternating between first and left field, and R. A. Price '27 showing go

At second base J. K. Anderson '28 is receiving favorable consideration because of the hitting ability he adds to his fielding talents. T. B. Gordon '28 is another second baseman, who may be used there or at shortstop when McConnell is not available. McConnell gets first choice because of his ability at bat.

ability at bat,

Third base is being handled brillantly by Brignall, former shortstop,
who has developed in a manner pleasing to his coach. Brignall's hitting as sures him first choice, though L. H.
Cooper '28 is also a good possibility.
In right field, Max Lurie '28 may be
used whenever Marks is pitching.
Other fielding candidates are H. E.
Jonson '28 and C. W. Freeman '28.

YANKEES KEEP ON HITTING

NEW YORK, April 22—The powerful New York offensive got busy in the fourth inning, here, yesterday, against Ehmke of the Boston Red Sox and as a result, scored six runs in that inning and won the Yankee stadium's opening game by the score of 8 to 5. For a time it looked as though Ehmke would dispose of the Yankees in the same way that he did with the Athletics last week but the fourth inning ended his effectiveness. Meusel and Combs hit home runs for the Yankees. Flagstead continued his hitting rampage by obtaining two doubles and a single. The Red Sox offensive was not far behind the Yankees, the losers being outhit only 10 hits to nine. The score:

ANCHOR LINE 126 State Street, Boston or Local Agents Strong Team Out at Montana State

All But One of 1925 Regulars Return for the Baseball Nine

MISSOULA, Mont., April 17 (Special Correspondence)—With all but one of the regulars of last year's State University of Montana baseball club of 1925 available again this season, Coach W. E. Schreiber has started drills with the strongest squad that the institution has had since the Conference championship winner of 1921. Veterans returning are: Captainelect A. C. Meagher '26, first base; D. C. Hanson '62, second base; C. O. Anderson '26, shortstop; B. R. Tarbox '26, third base; E. W. Illman '26, left field; W. C. Kelly '27, catcher; A. N. Berg '26, catcher; C. E. Wood '27, catcher and outfielder; J. D. O'Connor '26, pitcher.

'26, pitcher. Recruits expected to make the team are W. M. Brown '28, pitcher; Wil-liam Rafferty '28, pitcher, and Wil-fred Fehlhaber '27, outfielder. The Montana infield has played to-

at bat.
Idaho, Montana and State College of

Washington are playing a series for the championship of the eastern sec-tion of the Pacific Coast Conference. The team having the highest percentage will meet the winner of the series between University of Oregon, Univer-sity of Washington, and Oregon Agri-cultural College, for the Conference title. If Montana does not win the eastern section honors, a four-game series will be arranged in June with Montana State College of Agriculture. The schedule.

May 6 and 7—University of Idaho at Missoula; 12 and 13—State College of Washington at Pullman; 14 and 15—University of Idaho at Moscow; 17 and 18—Whitman College at Walla Walla, Wash.; 19 and 20—Gonzaga University at Spokane; 26 and 27—State College of Washington at Missoula.

M. Layton of Milwaukee defeated A. H. Kleckhefer of this city. The latter scored 270 points, the contest going 267 innings. Layton took the final of six blocks by a count of 50 to 34 in 33 innings. Kleckhefer trailed after Tuesday's play, but regained the lead yesterday afternoon when he scored 70 to 50 in 53 innings.

PRINCIPIA HAS A GOOD SEASON

Basketball Team Wins 11 and Loses 4 Games With Kaw Coaching

ST LOUIS, April 12 (Special Correspondence)—The 1925-26 basketball season at Principla Academy here was one of the best in the history of the institution. Starting on Dec. 15 the institution. Starting on Dec. 15 the regular academy team played through a schedule of 15 games, winning 11 and losing four.

Immediately following the football season E. L. Kaw, former star player while at Cornell University, took charge of the basketball squad. Kaw succeeded Dr. A. E. Marquard, who coached Principia teams for three years previous.

years previous.

At the start of the season Kaw was obliged to form a team from only a fair-sized basketball squad. He had available, four regulars of the 1924-25 season, several second team players years previous. liam Rafferty '28, pitcher, and Wilfred Fehlhaber '27, outfielder.

The Montana infield has played together intact for two seasons and at the end of the 1925 schedule was as compact a defense as any team in the Conference could present.

Lack of pitchers handicapped the Montana team in 1925, but this year Coach Schreiber will have four pitchers of experience, O'Connor and Hanson being veterans, while Brown and Rafferty both have pitched independent haseball for several years, O'Connor last year won four of six games in which he pitched.

Kelly was the leading batter of the club last year, having an average of .333, while Anderson hit .306, with Meagher and Illman also ranking high at bat.

Ideb. Montana and State College of the season to the Beaumont High School .35 to 22. Central Magner and Illman also ranking high at bat.

School League, defeated Principia, 22 to 8, in the third encounter of the season. After this defeat Principia showed improvement and won five straight games.

straight games.
Of the four games lost during this season, two were to Central High School, one to Beaumont High School and the fourth to the Soldan High School in an extra period game. In only four of the 11 victories was the margin of points close. Probably the most interesting games

on the Principla schedule were those with the Central Wesleyan College quintet of Warrenton, Mo. and the Western Military Academy team from Alton, Ill. For the first time in four Academy five defeated Western 22 to 20 in the first game and 29 to 25 in the second contest. Western had a strong team which finished near the top in the St. Louis Preparatory School league race.

During the 1926 season The Principia team rolled up a total of 376 points in 15 games, or an average of 25 points per game. The highest number scored in any game was 60, while the lowest was 8 points. Opposing teams scored 276 points in the 15 games played.

R. J. Richardson '28, at right forward, led in the individual scoring for the Academy team. He finished the season with a total of 143 points in 15 games, an average of nearly 10 points per game. In order to reach the total of 143 points Richardson

threw 57 goals from the floor and 29 goals from foul.

Second scoring honors went to Capt. preston. A. Richardson '27, who played through the season at the left forward position. He counted 41 floor goals and 14 goals from foul for a total of 96 points.

Fall River to Meet Boston in Replay

American Soccer League Challenge Cup Competition Continue This Week-End

AMERICAN SOCCER LEAGUE

The second week of the American Soccer League Challenge Cup competi-tion finds those old cup tie rivals, Fall

New England fans will watch the outcome with considerable interest as the victor is to meet Providence in the second round on the later's pitch.

At New Bedford on Saturday, the Whalers will match their skill against the J. & P. Coats team and judging from the way both teams have been playing of late, another great game is due. In the United States F. A. cup competition the unbeaten Bethlehem Steelmen won the right to proceed to competition the unbeaten Bethlehem Steelmen won the right to proceed to the grand final only after a strenuous struggle against the Threadmen. New Bedford will try to even up for 1-to-0 defeat by the Threadmen in second round of the national cham-plonship.

New York fans will have two Cup

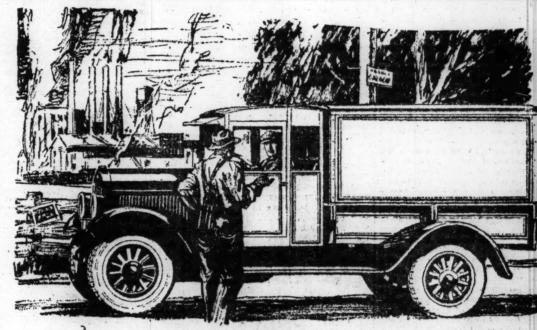

Tie attractions. On Saturday Indiana Flooring will try to add the New York Giants to their string of victories. This Giants to their string of victories. This is the second occasion on which the progressive Indiana Flooring Company management has staged a major attraction in their efforts to popularize Saturday soccer in the Bronx. The response to the first attempt was so well received that this cup classic so well received that this cup classic between such evenly matched op-ponents is bound to consolidate the

loorlayers innovation On Sunday Newark will have Beth-lehem F. C. as second-round op-ponents and the 1926 national champions will have to display their best brand of soccer in order to be certain of reaching the Metropolitar final. Newark always gives Stark, Bethlehems famous center forward, a warm welcome and the former Harri-

warm welcome and the former Harrison star generally reciprocates.

Owing to the lack of available openings and to the demands of the cup competition, only one league contest is scheduled for this week-end. The champion Fall River team will meet Providence at Tiverton, on Sunday in a real star attraction and as the former have a hard contest the day before at Boston, this looks like a golden opportunity for the latter to add a brace of points to their score. If they can accomplish this feat, they If they can accomplish this feat, they will be level with Boston in the league

finishing in the third place.	anco

Farmers From All Over Ireland Assemble for the Annual Spring Show in Dublin

DUBLIN ANNUAL SPRING SHOW A MECCA FOR IRISH FARMERS

Pure Business Dominates in Interest, and Awards of what they think it is in the interest Judges-Plan to Send Traveling Caravan on Rural Tours

DUBLIN, April 12 (Special Corre-|fered seriously with his work, and a

and to renew old acquaintances.

Thousands of cattle, sheep, pigs, and poultry are brought into the judging ring, during the four days the show is held, and valuable cups and prizes are won in some hundreds of classes. A great number of farm-ers, cattle breeders, and dealers are induced to make the journey from England, and an air of keen business obtains from the time the turnstiles admit the first visitor until the show Ireland lives by its cattle.

During the horse show weet, dis-cussions of fashions, plays, and books can be heard, but during the spring show these things hardly enter into the conversation of the hundreds of farmers and their wives who make their annual pilgrimage to Dublin. They are far more intent on the awards of the judges, and the good points of the cattle which they and their neighbors are exhibiting.

Working Models Of recent years, especially since the war, the mechanical side of the spring show has been developed considerably, and the exhibits of agricultural machinery now include all the latest devices for the improvement of the farm. The prin-

cinal British firms have working models in the show grounds, driven chiefly by internal combustion en gines; but now that there is early prospect of cheap electrical current in the Free State, an effort farmer in electrically driven ma- enterprise

ance in the machinery section was much larger than in former years, and great interest was displayed in the various working models.

Traveling Caravan in contemplation for the education of the Irish farmer, and incidentally for the advertisement of the Shanfor t non electric power scheme. It is suggested that a traveling caravan had spent in putting on these few to the warmest thanks of the whole MRS. HOFFMAN shall be fitted out with all the latest additional pounds of weight is churns, separators, etc., and shall be sent on a tour of the rural areas. All the models would be worked by electricity and in the models would be worked by electricity and in the models which they have spent a considerable amount of models. tricity, and in this way the farmers, many of whom live too far away from Dublin, or are too poor to visit the Spring Show, would be brought into direct touch with the most recent developments of agricultural science.

The poverty of the Irish farmers is a formidable obstacle in the path is a formidable obstacle in the path of agricultural progress. The great majority of the holdings in the Free State are less than 50 acres, and very few of the farmers have sufficient capital to purchase modern machinery. Even if they had the capital, their holdings are too small to justify the expense. For this reason attempts are being made to encourage co-operative enterprise, and to get parties of farmers in the same district to club together to buy motor plows and tractors. tor plows and tractors

Ireland One of Most Beautiful Countries of Europe, With Surprise At Every Mile

IRELAND URGED - TO ADVERTISE

One of Europe's Most Beautiful Lands, Its Variety of Scenery Has Few Equals

DUBLIN, April 12 (Special Correspondence)—Ireland, so far, has not slized the possibilities and the potential wealth of a well-organized tourist traffic. That is not because of lack of counselors-both native and otherwise-but is due to the Innate conservatism of the race and the lack of a leader capable of carrying through a campaign—and, incidentally, of providing the necessary capital.

The tourist traffic was at a stand-still for 10 years, and even now one finds people who ask "Is it safe to go to Ireland?" There are today quite a number of people who fancy that a visit to Ireland must be undertaken with more courage than Livingstone needed to explore Central Africa. The trouble, of course, is that they hear more of Ireland's troubles, usually greatly magnified, than of her progress, which, if not

speedy, is sure.

Ireland is one of the most beautiful countries in Europe, with a variety of scenery that has few equals. Anyone with a taste for country life could never complain of monotony, for in most counties there is a surprise at every mile. This has never been exploited.

Ireland Not Advertised Only recently Sir Sefton Brancker, on his return from a visit to the United States, put the case very bluntly. He said that he was greatly also brought motorboats to the lakes and a new restaurant has been surprised on seeing the advertise- opened by the Great Southern Railments of most European countries

And with this move the library. which first became a vital part of the cultural life of Los Angeles in 1872, will enter into a new period of usefulness, aided incalculably by the Capitol buildings. As Mr. Lawrie wrote to Dr. Alexander dur-ing the preparation of the building's plans, "The library and the Nebraska Capitol building are alike in being plans, "The library and the Nebraska Capitol building are alike in being masterfully planned conveniences of the only buildings in the country with such a comprehensive program

Conception and execution of this building has from the first been in the hands of artists and craftsmen whose skill in their individual tasks is nationally acknowledged, and who have brought to the planning of the library understanding of the æsthetic allegorical panel representing the torch of learning handed on from values of the building's purpose. Bertram Grosvenor Goodhue, whose services to American architecture were recognized by the posthumous award of a gold medal by the Ameri-figures on the four sides of the can Institute of Architects, drew up the first plans and collaborated on the entire general scheme of the by David and St. John, psalmist and building, including sculptural and ters of philosophy and allegory; Homer and Milton, epic and cosmic

other decorations. Dr. Hartley Burr Alexander of the University of Nebraska furnished the scheme of sculptural decorations and inscriptions. Lee Lawrie of New York executed the sculptural subjects. Julian Ellsworth Garnsey of Los Angeles painted the interior mural decorations. Carleton M. Winslow carried to completion with fidelity to the original plans the work of Mr. Goodhue. And over all creative endeavors Everett R. Perry, librarian, and the directors of the library kept watchful vigilance, and had no small part in the successful completion of the building.

Mr. Goodhue was greatly pleased in drawing up his plans with the of effort directed toward the work by all those connected with it.

Music News and Reviews

the Ninth Symphony

LOS ANGELES, April 12 (Special Correspondence)-The Ninth Symphony of Beethoven is virtually new music to Los Angeles. As such it it, something more majestic can be drawn from Scriptural suggestions.

When completed and equipped, the Herbert Brenon and his company, certs of the Philharmonic Orchestra

Gluck overture, "Iphigenia in Aulis," with the Wagner ending. It put the listeners in a mood for Beethoven. The opening Allegro sounded its soft chord over a hushed audience.

The Scherzo was a triumph for this virtuoso orchestra. Instrument followed instrument with a precision and joy in its working-out that was a delight both for players and listeners. The Adagio was a supreme opportunity for Mr. Rothwell and he made the most of it. This movement was one of the most impressive per-formances ever offered by him. The warmth and dramatic effectiveness of the Finale made the hour and quarter of Beethoven curiously short The chorus, which has been formed Detroit Orchestra as a permanent group under the direction of Squire Coop, responded brilliantly to the director's baton. Several well-known artists joined the chorus to aid in the success of this outstanding musical event.

Claire Dux distinguished the difficult soprano part of the quartet with really fine singing. Royal Dadmun opened the "Ode to Joy," with a mag-His voice was the best suited to the from San Diego, gave a fine account of herself in the contralto rôle.

It is to be expected that in view of the long preparation which Mr. mitted now to become more familiar with the Beethoven Ninth.

Olga Forrai Soloist With Cincinnati Symphony

CINCINNATI, April 21 (Special last pair of concerts for the season sorgsky, while Glinka's Overture, to be given by the Cincinnati Sym. "Russlan and Ludmilla," was a brilin all cases been unified completely with sculptural adornment. They vary from the simple words above the Children's door, "The World is My Book," and the invitation, "Books are doors into Fairyland, Guides unto Adventure, Comrades in Learning," to the more scholarly phrases indicative of the sources of literature. The care with which these details were worked out is indicated by Dr. Alexander in describing the ornament of the North Terrace entrance to the library, where the intrace to the library, where the intrace of New Los Angeles Public Library.

Architect's Picture of New Los Angeles Public Library.

Library from the simple words above the Children's door, "The World is \$2,000,000. It consists of three stories \$2,000,000. It consists of three stories and a program of shorter orchestral works and two each of shorter orchestral works and the "American and a two-story wing of 90x120 feet. An immediate capacity of 1,000,000 books with dimensions of 180x240 feet and a two-story wing of 90x120 feet. An immediate capacity of 1,000,000 books with dimensions o sented. She sang them, however, excellently.

> Opening the program was Ernest Bloch's "Concerto Grosso" for string orchestra and piano. This was new to audiences here and was well received. It was splendidly played, and the orchestra, as well as Mr. Reiner, was forced to acknowledge the applause. Karl Young was at the piano.

The humors of the Dukas "Sorcerer's Apprentice" led off the second part of the concert, and again Mr.
Reiner and his men scored by their
performance. Saint-Saëns' "Danse
Rae A. Shepherd

Macabre" and the overture to Humperdinck's "Königskinder" were the other numbers.
For Mme. Forrai there came first

three Wagner songs "The Angel,"
"Pain" and "Dreams. Perhaps it is
because these are more frequently

met the influences of the sea-faring people.

This explains this curious room from Portugal which might have been taken bodily from the Orient. Long panels of picture work alternating with red lacquer strips of black in the framing, and mirrors give the impression of Chinese influence. At the same time it reminds one of the France of Louis XIV and its influence upon King John V of Portugal. The picturing on the panels gives a landscape with hills, streams, rich forests of pine, cypress, fruit trees and native plants in whose associations the camelia of Portugal meets the chrysanthemum of China.

Dick's father contributed; "but I took it for a boy a bit older than you, son. I noticed him especially, sound of sawing and stepped although it was after dark, because through the side yard to a gleaming he was standing so still among the

'It will be nice to have that charmold place open again," mused

"I wish one of them would turn out to be a boy," said Dick, who with all his friends did not have a chum. Then the conversation shifted to school matters, Mr. Starret, the Principal, and Dick, a sophomore, being equally interested in school affairs.

This was in the middle of February. For a few days Dick watched the Lilac House when passing. The opened shutters, a light at evening, fresh blue shirts upon the line, all proved occupancy; but he saw no one. Upon inquiring around he learned only that the house had been rented to two Kennicot brothers who worked in Mine 141. Then came spring vacation and the thaw. The ennicots were forgotten for a w for Dick and his parents went to the Starret Camp for Boys in Maine, to what they could toward the summer preparations.

Dick's Discovery

"Look into the yard of the Lilac House when you go by to school," morning following their return. And Dick remembered to take that route homeward from Scout meet- this town buy those houses and get "I'v

houses!' Sure enough! And in all the best Sure enough! And in all the best on the porch examining the remaining ones when a young man came day." places in that tangled old yard.

They swung from the branches of up the steps.

"Hello!" he greeted them. "Are "Hello!" has that are booming my high trees. (Some climber!) They were tucked into notches. They were under the eaves of the battered brother's Bird House Store?" "conservatory." Two wee ones were on poles among the bushes, and one it going," laughed Dick. "Where is to birds, but he could see him.
ese houses were meant for "Off in the country. Every day that these houses were meant for

about the "business," and then the group broke up. Dick was at last alone with young Mr. Kennicot, who asked him to come over later when his brother had returned. "You must By MILLICENT TAYLOR

OME people have moved into the old Lilac Place," Dick called out to the family, as he flung his school books in a heap and clattered upstairs to wash the old clattered upstairs to wash way to and from school. He was referred upstairs to wash way to and from school. He was referred upstairs to wash way to and from school. He was referred upstairs to wash way to and from school. He was referred upstairs to wash way to and from school. He was referred upstairs to wash way to and from school. He was referred upstairs younger than Karl," he guessed. "And I suppose you're still in school. Karl would have graduated this year, but there're just the two of us now, and he wouldn't let me support him.

shaft elevator each morning and go into the earth." At dinner Dick told the whole experience to his father, who looked thoughtful. The twilights were long sound of sawing and stepped through the side yard to a gleaming now, so it was still a soft dusk when trod the mossy brick walk of the Lilac Place to greet the Bird House Boy, whom he had espied in the deep side vard. Karl Kennicot

and, noting the fine, straight brows and strong, gentle mouth, added, "I'd like to know that chap." Next morning a sign was swinging from the porch of the Lilac House:

self busy at a work bench. "The Bird House Boy," Dick said aloud, "Sh!" Kennicot whispered to him, blue eyes shining, "Hear them?" and he nodded up to the house on the pole, from which were coming sweet flute-like songs and notes. "Purple martins," he explained, "They came today—a colony of them. I was afraid the house would be vacant."

The two boys listened in silence; the lattice lined with shelves. The then Karl turned to Dick cordially, whole space was filled with bird "But you're Dick Starret. And "But you're Dick Starret. And of every size and make. owe you all kinds of thanks. Per-There were simple painted ones, haps you'd like to see everything."

birch bark covered ones, rustic ones Then began the most interesting made of slab board, large apart- evening Dick had ever had. Kar nents with many doors, and open took him around the old yard, now shelves for robins' nests. All were fragrant with lilacs and Lily-of-the-labeled with a neatly printed de- Valley, and told him softly of the scription giving the kind of house, tenants in his bird houses. On the the sort of location it should have, window sills he pointed out "bird the food that would attract, and the price. On a rickety table was a box clearly visible from indoors. In the house he showed rough sketches of these dinner guests, with notes on their habits, and a shelf of well-"Dad, it's wonderful. Those thumbed bird books. In the cellar suggested Mrs. Starret the second houses are great!" exclaimed Dick Dick was introduced to the wood in the Principal's office at recess. shop, where plans and sketches for "I don't know anything about birds, new houses lay about among the

"I've talked the whole time," Karl laughed when Dick said good-by.
"But working in the mine I don't see rate, and the boys, admiring the array and the workmanship that had made it possible, soon joined in. By made it possible, soon joined in. By feel like it, Grop around tomorrow. Friday the houses were nearly all We'll take a hike and I'll make you gone. Dick and a few friends were do the talking. We're having a holi-

The Picnie

The morrow was one of those heavenly blossom-scented Saturdays May can give, and the Starrets decided on a picnic. So, instead of a hike with Karl, Dick persuaded both large one topped a pole in the open the Bird House Boy?" This was the Kennicots to jump into the flivver, name by which they all had called and the party went off over the hills to a gorge the Starrets knew.

principle—Beauty. This recalls Rus-kin's definition, which we quoted in the edifices raised by man for whatsoever uses, that the sight of them contributes to his mental health,

power, and pleasure."
Fitness includes much. It means con over the coals. After supper as they sat in a cozy circle around the glow that cut them off from the darkened world, Mr. Starret, who had been talking quietly to Earl, suddenly addressed the Bird House of architecture develop.

The next development after th Roman style was the Early Christian. During the first three centuries of the Christian era there was little need of building, for the Christians were persecuted and were often obliged to meet secretly. But early in the fourth century the Emperor Constantine was converted to Chris-Constantine was converted to Christianity, which he made the state retianity, which he made the state re-

these is standing now.

They were spacious rectangular called Red Fife, which, on account of halls with an apse, or semicircular the length of time it required to recess, at one end. They were very plain on the outside, but richly decorated with mosaics and marble on the inside. Down the center was the nave or central aisle separated from the side aisles by rows of columns. The part above the columns was called the clerestory. The walls of this portion were pierced with windows. These basilicas had wooden roofs. A framework of beams and rods made a continuous bridge or support across the open space. This sort of roofing is called a truss. In front of the basilica was an atrium, or forecourt, surrounded by a covered arcade. Later we shall see how other great styles developed from

The best example of the basilican style is "St. Paul's Outside the Walls" in Rome. This is one of the greatest sights of Rome. The original church was burned, but this one is almost an exact copy.

more than passing interest, com-bining as it does the early maturing qualities of Hard Red Calcutta obtained from India with the good yield and quality of Red Fife, which latter is believed to be of Russian origin. Marquis not only matures earlier than Red Fife (about seven days) but it excels the latter both in yield and quality for bread-making. On the basis of actual tests made at the experimental farms during the past years, Marquis has out-yielded Red Fife by about five bushels per acre. A simple calculation will show that this means added wealth to Canada each year of probably \$100,-'Fidac' "Fidac" is probably a new word

to most of you. It stands for "La Federation Interallies des Anciens Combattants." and is certainly a more convenient title for everyday use. It is a federation of the war veterans of nine nations—Great Britain, Belgium, Czechoslavakia, France, Italy, Jugoslavia, Poland, Rumania and the United Statesand represents a membership of some 10.000.000 veterans of the World War and their families, men who know something of the horror of war and are now banded together in the cause of peace.

The president of Fidac is Col. George R. Crosfield of London, England, and next week he and Mrs. Crosfield are visiting America as guests of the American Legion. They will tour the United States on Told in Pictures is very nice. I albehalf of the Fidac peace program. for Fidac has set before it definite goals. Here are some of them:

1. Advocacy of disarmament. 2. Adoption of a draft system by which man-power to fight, man-power to work, economic power to produce and money power to finance would be called to serve on terms of equality in case of war.

3. International support of the Boy Scouts. 4. International exchange of col-lege professors and students as a Christian Science Monitor. Our 4. International exchange of col-

means toward closer understanding.
5. Comparison of legislation for the benefit of the veterans in various countries, by which much already Bag. Isn't this the first letter from has been accomplished toward improving the condition of disabled and needy veterans and dependents.

Who Knows?

The following questions are based on the Canadian Supplement of April 16:

1. What are the six main gateways of Canada?

2. What is the emblem of Canada? 3. Where is Lake Louise?

4. In what province of Can-ada does the Prince of Wales own a ranch? 5. What part of Canada has

been described as "Twenty-four Switzerlands rolled in one"? Answers to questions:

Answers to questions:

A monoplane is a flying machine which is supported by one plane. The Detroiter and the Alaskan are the airplanes used by the Wilkins Arctic expedition. Muscle Shoals is on the Tennessee River, in northwestern Alabama. Wordsworth wrote "The child is father of the man," in his little poem beginning, "My heart leaps up when I behold." The new Viceroy of India is Lord Irwin.

Q. Why is an elephant like traveler? A. Because he puts everything into

his trunk.

Jeruing Javing and Spending

ADIO presents a big and promof radio reception engrossing, partly covered. because they have been able to construct sets of their own with which to experiment. Cv Halverson, a youth of 17 living in a Minnesota town of 7000 people, is a great radio fan, who

has built many receiving sets for himself and for his friends, and is now making money out of his ex-When he became known in town as quite a radio expert, people began to come to him for assistance when they had trouble with their sets or were going to install new instru-ments. Cy soon discovered that he could earn pocket money by charg-ing for his services. As there are

many radio sets constantly out of order, he is often pretty busy. When he is able to repair a set, When he is able to repair a set, he charges a reasonable price for his work; if, however, he cannot locate the trouble or make the set function, he charges nothing for his time spent on it, "I don't know everything about the radio," he says, "and I'm paid only for what I know." But there are few troubles that he is unable to remedy.

Besides repairing, he also does installing of new instruments, which

Besides repairing, he also does in-stalling of new instruments, which includes the setting up of the aerials.
Aerial work is his specialty. Radios are sold every day, and somebody must install them. Cy has made arrangements with several dealers in his town to install the radios they sell, and they pay him so much for each installation plus the cost of the cerial, which he furnishes himself.

installation plus the cost of the aerial, which he furnishes himself. Lots of people send for their sets, or buy them at a price which does not include installation, and for a great many of these persons Halverson does the installing.

He buys his aerial material wholesale, therefore he makes a profit on what he sells. He can furnish a good aerial for \$6 or \$9, according to the kind wanted, and can usually set it up in about half an hour. He says that erecting an aerial is a simple matter which can be learned in a very short time. One can make a special study of this branch of the radio business by perusing a good book on the construction of aerials and reading upon the subject in radio magazines.

Besides obtaining business through dealers, he gets more by talking work is his best advertising, because people he has done jobs for recommend him to their friends. He keeps only two or three aerials on hand at a time, so not much money is needed for stock. Neither are many tools required. All the tools Halverson uses are a knife, a hammer, a battery tester, a screenfiver and a pair of pliers. Of coarse, a ladder is also needed, but one is found at almost

every home, or one can easily be

borrowed from a neighbor.
"When repairing a set," says Cy,

How Some Boys Make Pocket Money

Boys who are mechanically in-lined have here an interesting field "Oh, Mr. Starret—would I?" And

Boys who are mechanically inclined have here an interesting field in which to experiment and at the same time earn money. Halverson earns as much \$150 a year in spare time with this work.

"Oh, Mr. Starret—would I?" And Karl choked and could say no more. "That's great!" said Dick contentedly. "Tent me in with the new woodcraft counselor, Dad."

EDUCATIONAL

Unit Method in Teaching, in Book by Chicago Professor In his section on "Outlines of an Appropriate Technique," in which he discusses the handling of classes studying by the unit method, Pro-

Chicago, Ill.

Special Correspondence
THE mastery and teaching of material by a unit method rather than by mere lesson-learning and lesson-hearing is advocated by Prof. Henry C. Morrison, of the School of Education at the University of Chicago in his recent book, "The Practice of Teaching in the Secondary School." (University of Chicago Press.)

attention on the pupil's performance of assigned tasks." This leads logically and inevitably to the appraisal and control of pupil progress which is the opposite of mastery namely, the "theory of the passing grade." Thus arises the passing grade as a learning objective, the product of learning. Education becomes a 70 per cent performance.

"The normal product of practice in lesson-learning is improvement in

The objective here is an adaptation, a new attitude toward the past, described perhaps as a conviction of the nature and inevitable consequences of a long posicion of the con quences of a long period of per-sonal government." In the process of acquiring the adaptation, the stu-dent listens to lectures by the teacher and reads a great deal. He becomes acquainted with the arroof the reign of Louis XV, with Voltaire, with Rousseau, etc. "Some these experiences remain in his memory. But they are no more products in learning than are the norable experiences in daily life. Out of them arises the new attitude, and it is this attitude which becomes the real and serviceable product of learning, and not the experiences themselves. If the pupil retains mere memories of isolated facts without any modifications of attitude whatsoever, he has learned nothing, and so far as the unit is concerned, remains intellectually sterile."

Defining the secondary school as a region "in which a pupil is capable of study but is incapable of systematic intellectual growth except under the constant tutorial Morrison puts first in importance an abundance of literary reading material, the pupil early in his school experience learning to "see through the printed page to the thought or scene of action which is the subject of the discourse," a process he calls "reading adaptation."

"In general, any actual learning is always expressed either as a change the attitude of the individual, as the acquisition of a special ability, or as the attainment of some form of skill in manipulating instrumentalities or materials," says Professor Morrison. This threefold result of actual learning, as opposed to the traditional conception that education and erudition are identical and that and crudition are identical and that learning is not a question of the youth and his adjustment but of the youth and his acceptance of other people's ideas—brings one to the point that the subject matter used in the school is not valuable for its own sake, but only as it is serviceable in generating intelligent and useful inclinations, abilities, and skills in the clinations, abilities, and skills in the clinations, abilities, and skills in the cessful that it has become permanaged.

"Whereas skill can be possessed in lient and its example will probably varying degrees, adaptation is a unitery thing: the pupil has either made lin.

or not made the change of attitude resultant from his study." And soon old quarter of the city, the building

Toronto, Can.

"The Practice of Tracana" (University of Chicago Press.)

The unit method of teaching in this connection is illustrated as follows: "A unit in history may be, real units only casually and in a lows: the French Revolution. The unit method of teaching in the lesson-learning is improvement in ability to get lessons, and lesson performance transfers to learning in the school," he emphasizes, "is not only adjustment, but adaptability, not only putting the youth in intelligent contact with the world as it is, but contact with the world as it is, but contact with the cultural tools

I-do-next attitude' or the 'that'swhat-it-says-in-the-book attitude,' we shall not go far wrong."

fessor Morrison suggests the application of what he calls the "Mastery Formula": pre-test, teach, test the result, adapt procedure, teach and test again to the point of learning. In other sections he takes up such matters as: sustained application. measuring group control, units for various subjects, free reading, technique in practical arts, in foreign languages, in English composition.

Study Projects for Monitor Readers

In view of the steady advance of commercial aviation, what, in your opinion, is the best means of stimulating interest in establishment of municipal landing fields?

Have railroads as common carriers, already in the field with heavy investments to protect, a legitimate objection that multi-plication of such landing fields will amount to a form of subsidy detrimental to railroad interests?

Is the establishment of such landing fields an indication that a degree of "government in business" may be recognized as wisdom, or is it open to criticism by opponents of all forms of municipal ownership? (See Monitor of April 6, 7, 17, 19, 20.)

One agricultural expert urges the need of a definite program of merchandising the country's surplus agricultural products; another declares that within a few years the advance in population in the United States will increase the demand for agricultural products to a point beyond the prospective supply. With these statements in view, should the Congress of the United States undertake to pass anything more than measures of temporary relief?

Does a study of available farm lands in the United States warrant a belief that the time is soon coming when this country will be unable to feed its population?

Should the Government take steps to encourage a greater use of electrical equipment on the farms with a view of stimulating (See Monitor of April 2, 9, and Feb. 20, 26, March 3, 4, 5, 8, 20.)

Two questions, based on matters of public interest recently printed in The Christian Science Monitor, are put regularly in the above form on the Thursday Educational Page. The purpose of these questions is: To assist in a more thoughtful reading of the Monitor—on the part of all its readers. To present questions adapted to use as the basis of discussion or debate in secondary schools and colleges; frequently one for the upper elementary

TERMINED to have views on education from representatives of business, trade, and rural schools, he concluded: "Education for business involves Association at one of its recent sessions had as speakers the general manager of a department store, the head of an agricultural college and the president of a trade and laplace and the president of a trade and tr nowhere is a flagging of work perceptible, but on the contrary, while in such branches as natural science, plement to such men, good servants geography, biology and drawing in all walks of life, high-minded, there is great general advance. An The first speaker, C. L. Burton of the Robert Simpson Company, who dealt with business education said in part:

"Business is society's instrument of service to provide it with commodities which a highly developed civilization affords, and involves all the subsidiary activities of manufacture, banking, finance, engineering and various classes of labor. Business is nothing other than a series of services in which the spirit must be uppermost.

"The first requirement in education is a good moral standard, and educators must create also a desire for hard work."

"Old work."

"Old workers and usuch men, good servants in all walks of life, high-minded, public men, intelligent and industrious administrators of the law, honest lawyers, unselfish professional men, efficient farmers and exploiters of our great natural wealth."

Tom Moore, president of the Canadian Trades and Labor Congress made the following remarks:

"We must remove from our schools the military training which is being injected at the present time. Education ists should glory in peace as well as in war. In 1883 complaint was registered that the educational system then in vogue tended to create too many teachers and too few manual workers. To remedy this, Labor conditions and workers are now counting the days are alwaying there is great general advance. An atmosphere of good fellowship, moreover, prevails such as never obtained before. The classes from terzia to ober-prima—corresponding to the English third and sixth forms—comprise altogether over 100 scholars. These, preparing for their matriculation, have proved the physical and mental advantages of the innovation and a government inspector has stated and industrious administrators of the law, honest lawyers, unselfish professional men, efficient farmers and exploiters of our great natural wealth."

Tom Moore, president of the Canadian Trades and Labor Congress made the following remarks:

"We must remove from our schools the military training which is being and a government inspector has stated and in

tem then in rogue tended to create too many teachers and too few manual workers. To remedy this, Labor has urged and assisted in creating teachers are now counting the days our technical schools and vocational training.

For the winter term the school found new quarters in a more modern building in the city; pupils and teachers are now counting the days until they recommence study among the forest surroundings that have the forest counting the city; pupils and teachers are now counting the days of the forest counting the forest counting the city; pupils and teachers are now counting the days of the forest counting the city; pupils and teachers are now counting the days of the forest counting the city; pupils and teachers are now counting the days of the forest counting the city; pupils and teachers are now counting the days of the forest counting the city; pupils and teachers are now counting the days of the forest counting the city; pupils and teachers are now counting the days of the forest counting the city; pupils and teachers are now counting the days of the forest counting the city; pupils and teachers are now counting the days of the forest counting the city; pupils and teachers are now counting the city; pupils are now counting th

to mere based on the principle of dominance of the individual—of possessive power. The new idea in education is a training for service."

He referred to the methods of Sanders at Oundle School in England, who had revolutionized the public school system by introducing creative methods, making mathematics, languages and science not ends, but tools which the boy accustomed himself to use.

Mr. Burton was in sympathy with the idea advanced by Premier Ferguson of Ontario, that boys of 11 and over should have men teachers, and the centralizing of school work would permit this.

"All subjects dealt with in school should arouse the interest of the scholar or be revised," stated Mr. Burton "Boys of 11 and up can operate machinery, build things, apply scientific principles, understand details of mechanical equipment, can learn languages and do higher mathematics.

"Teach your children the things which will enable them to do service without the nexpressed that the forest surroundings that have training.

"Fears are often expressed that the forest surroundings that have training for service."

He referred to the methods of Sanders at Oundle School in England in the education of the masses is leading to a condition where everyone wants 'white collar' jobs and will leave us without the necessary complement of manual laborers. This is a contention that labor opposes. There is no reason why a man should be illiterate to perform any task of labor any more than a reason why be caste system of India should be applied to occupations. Any job can be given equal dignity by establishing conditions where the laborer can live decently and hold up his head in the community. Put an education of general academic straining programs based upon foundation of general academic variety of Gollege for Women in Boston Screet, Boston University stated Mr. Burton "Boys of 11 and over should have men teachers, and the centralizing of school work with the caste system of India should be applied to occupations. Any job can be proving the foreign of th to prepare for Professional Acting and Stage Direction. Two casts giving a play every week in the school's own "little theatre." Expert direction. Superintendent Who Applies Baseball to His School System fied into three groups. First are the pupils who find it difficult to make

Enid, Okla. | and a generous course in manual Special Correspondence training But often it is just the other way, WENTY years ago, when E. D. and a boy or girl is forced to take ("Ted") Price was managing a business course at the demands of

the Wheeling (W. Va.) Baseball Club in the old Central League, his plea in the pinches was to just "play ball." Today he still is crying "play ball," but it is 5000 school children who hear the cry and instead of batting a timely single, they are turning in double plays on their report cards by mastering staid old lessons with the same vim the Wheeling boys showed when Price urged them to action when the seventh inning rolled around and found his squad

But Mr. Price has not held his job without difficulty. A few years ago Enid was overtaken by the progres-sive urge that comes when a town passes the 15,000 mark and many civic leaders were of the opinion that Enid's school system was a little out-of-date and in need of a modern educator to take the helm.

It was then the town discovered just how much the "play ball" edu-cation plan meant to the children. Eastern experts in educational re-search were called to Enid to conduct an investigation. Instead of recommending the so-called newfangled ideas some citizens believed the school system needed, the visitors took notes on the "play ball" system and calmly told the city that Mr. Price had accomplished what re-search workers had been trying to do for years. That was to make the studies fit the child instead of the pupil fitting the course of study.

There is no use trying to force a In accepting the national chairmanchild naturally slow in mathematics to try and keep pace with the children who find such study easy."

This theory is summed up in one

sentence written on the blackboard of every schoolroom in Enid by Superintendent Price. It reads: "All boys and girls who do their best are promoted in Enid

This comforting sentence is credited by Mr. Price with having the same effect on a student as the words of a manager agreeing with a batter, who has just struck out, that the six inches.

Superintendent Price was a member of the Oregon University summer

the parents when the arts are more suitable for them.
Students in Enid schools are classi-

their grades and are given private tutoring on the difficult studies. Second are the ones who are in the average class and plod along and always get by. The final classification includes the children who have

fellows.

Last year \$16,000 in tuition fees was paid into the Enid school fund by persons outside the city eager to e their children benefit by the Price system. One man who owns extensive property in Florida braves the Oklahoma winters to be with his children here so they may attend school under the Price plan.

But "Ted" Price still plays ball. He takes as much delight in chasing flies today as he did when he speared Wheeling. After the story of the Price school system comes the story of Price himself. Slated for the scrap heap when his baseball days ended, Superintendent Price put away his fielder's glove with his spiked shoes and started to school. By hard work he obtained a degree to teach school, and rose from a poorly paid teacher here to the head f the school system.

The father of seven children, Mr.

Price knows how to handle them in all sizes and dispositions. He now has a daughter in Columbia Univer-sity, a son in the Naval Academy, two children in the Enid High School, two in the elementary school and one 4-year-old son at home.

Parent-Teacher Activities

absolutely necessary, because the Teachers. The pamphlet is for the pitcher has the advantage. The same guidance of parents in the home, theory can be applied in the schools. teachers and parent-teacher groups. Geneva, Switz. | quaint old village of Onex, a well Special Correspondence of Geneva it is natural that the idea of international education for the young should take root and drive in the motor omnibus provided flourish. In 1924 an association was formed to finance a school founded take some of their lessons at the shown unusual ability and finish school with almost twice as much on the ideas underlying the League work to their credit as the other of Nations, where personal and national tolerance should prevail among the pupils. A group of officials of the League of Nations, of day school, thus providing an ideal the International Labor Office, and arrangement by which both resident

other international organizations and non-resident pupils profit. centered in Geneva, conceived the ision of this new type of education. In the first year 42 pupils of nine tumn of this year. different nationalities were already enrolled. Today the number has increased to 75 pupils, varying from 6 to 16 years old and representing 15 different nationalities. Fourteen are boarders and 61 are day-boarders. When one has visited these school cooms filled with children of 15 dif-

tunity.
The Nations Represented ferent nationalities, one is tempted o regret the all too-national education past generations have received which included no suggestion of international co-operation or conciliation, so pre-eminent in the thoughts of those who have the welfare of future generations at heart.

From all parts of the world men and women have come together in Geneva to help in working out a new ideal of international relationships so that in this relatively small city are assembled a multitude of different types and mentalities, offering unique opportunities for the establishment of this new system of education.

A Miniature League The school is indeed a miniature

League of Nations where mutual comprehension and the ideals of brotherhood are continually emphagized Meanwhile as the headmaster of the day-boarders, Paul Meyhoffer, remarked: "The younger the children begin to learn this lesson "When we, as a nation, have of interdependence between nations, the easier it is."

All teaching is in two languages, English and French; German is taught separately. Italian and Span-ish-speaking children will have special classes arranged for them, with lessons in their own literature.

The great aim of the school is to develop individual responsibility and inherent in all men; that there is to build up a sense of discipline riculum is essentially different from the ordinary school, for all instruction is drawn, not from one nation

The different departments are in charge of the best available professors, and the classes take place in large, airy, well-ventilated rooms. In conjunction with the school for day-boarders in the Rue Charles Connet, the resident pupils are accommodated at the Villa Onex, in the

RAILS LEAD ADVANCE IN SECURITIES

Italian Debt Settlement, Easy Money and Merger Talk Bull Factors

NEW YORK, April 22 (AP)—The re-lovery in stock prices which started resterday, was resumed with increased rigor at the opening of today's market, which was featured by large transac-

which was featured by an extensions.

Initial gains of 1 to nearly 2 points were recorded by Woolworth, Vanadium Steel, Coca Cola, du Pont and Remington Typewriter. Interborough Rapid Transit touched a new 1926

high.

Bullish enthusiasm was created by the Senate's approval of the Italian debt settlement, easy money rates, revival of railroad merger talk and publication of several favorable industrial and railroad earnings reports for the first quarter.

Rails continued to lead the advance, or the service of the contraction of the service of

Rails continued to lead the advance, early gains of 1 to 2 points being re-corded by Erie common, Frisco com-mon, Missouri Pacific preferred, Pitts-burg & West Virginia, "Nickel Plate," Atlantic Coast Line and Rock Island. Money Abundant

rt covering again accelerated the Short covering again accelerated the advance in a number of specialties, South Porto Rican Sugar, Remington Typewriter, Pullman and General Electric moving up 2 to 3 points before the end of the first half hour, General Electric crossing 301.

Foreign exchanges opened steady, demand sterling ruling around \$4.85\frac{1}{2}, and French francs advancing slightly to 3.35 cents.

Early gains were extended when the buying movement broadened out and pools resumed operations in many quarters.

quarters.

Encouraged by the immense amount of money available at the lowest rates of the year, call loans renewing at 3½ per cent, round amounts of different stocks were purchased on an ascending price level.

Speculative operations were prosecuted with considerable confidence all through the list, with investment buying again veering strongly to the railroads and high grade industrials.

Bonds Are Strong

Bonds Are Strong

With time money rates easing to the lowest level since last July and reports being revived of an early reduction in the federal reserve rediscount charge, the upward movement of bond prices gained momentum in today's dealings.

French bonds took a new lease on life following Secretary Mellon's statement that he hoped, if possible, to have a settlement of the French debt placed before the present session of Congress for ratification. Gains of 1 to 2 points were recorded in this group. Several new high records for the year were established by railroad liens in response to a series of favorable earnings statements and the improved consolidation outlook.

Conspicuous strength was developed by Northern Pacific, Nickel Plate, Frisco, Seaboard and West Shore issues.

Government sanction of the Tide Water-Associated Oil merger exerted a stimulating effect on petroleum bonds, Skelly 6½s leading the movement with a 3-point rise. Early gains of a point or more also were registered by Warner and South Porto Rico Sugar 7s, Bethlehem Steel 5s, Pressed Steel Car 5s and Marine 6s.

Buying of Liberty bonds was promoted by the easy money situation, three issues working into new high ground for the year.

MAINE CENTRAL MAY PAY SMALL DIVIDEND

PORTLAND, Me., April 22 (A)— President Morris McDonald announced at the annual meeting of the stock-holders of the Maine Central Railroad sterday that he would recommend the May meeting of the directors at they declare a small dividend on the common stock, on which no divi-dends have been paid for six years. "Taking into consideration that

"Taking into consideration that operations in the first quarter of 1926 probably will show a surplus of \$100,-100 and that the outlook for the year is favorable," he said, "I feel quite confident that we can do this with safety."

safety."

The stockholders authorized a refunding bond issue on the Portland & Rumford Falls Railway and a contract with the State for building the combination highway and railroad bridge over the Kennebec River at Bath.

President McDonald announced he expects to have a final report next month on the proposal to electrify the company's main line.

The present board of directors was re-elected and they in turn re-elected President McDonald and the other of-floers.

AWAIT LARGER RAEIGHT TRAFFIC CHICAGO, April 22—"I look for heavier movement of freight during the summer months than last year," said President H. R. Kurrie of Chicago, Indianapolis & Louisville. "Gross revenue in the current month is running between 5 per cent and 10 per cent ahead of last year. With the exception of the depressed condition of the coal mining industry, the outlook for business in our territory is good. We are not contemplating purchase of any equipment, but we may come into the market for a few locomotives later in the year."

Owens Bottle Company and subsidiaries report for the quarter ended March 21, 1926 net income after-all charges of \$1,-214.412, compared with \$941,690 in the corresponding period of 1925. After allowing for preferred dividends, net income for the first three months of 1926 was equal to \$1.64 a share on 694,186 shares of \$25 par common, compared with

CRUCIBLE AT 80 PER CENT NEW YORK, April 22—"We are oper-ting about 80 per cent of capacity," resident Wilkinson of the Crucible teel Company told stockholders at the nunal meeting. "Balf of our property operating at 100 per cent, the other lift not coming up to this percentage, we are making considerable improve-ents which will reflect in lower costs."

LARGE PROFIT

Burns Bros.' Interest in

profit of Burns Bros. on the sale of its 25 per cent interest in Pattison & Bowns to the United States Distributing Corporation early in January was \$1,150,000, a profit which will appear on the balance sheet of the report for the year ended March 31, but was entirely in addition to the earned 91¼ profits for the year which exceeded 14% \$2,600,000.

The quarter interest in Pattison & Bowns was acquired upon reorganization of that company in 1921, at cost of \$250,000 to Burns Bros. Subsequently, Pattison & Bowns took over the eastern selling agency for anthracite mined by the Erie Railroad's hard coal mining subsidiaries, the Pennsylvania Coal Company and Hillsida Coal & Iron Company. Wil-Hillside Coal & Iron Company. liams & Peters, which previously sold Erie coal, dissolved. Pattison & Bowns has njoyed a profitable career and the purchase of

Burns Brothers interest for \$1,400,000 was considered advisable by the United States Distributing Corporation, which owns 75 per cent of the hard coal disowns 75 per cent of the hard coal distributing company.

The profit from the sale of its interest in Pattison & Bowns brings Burns Brothers total profits for the year to \$3,750,000, or after preferred dividends of \$264,000 to \$3,486,000, equivalent to \$21.80 a share on 97,365 shares of class A common and \$13.80 on 97,367 shares of class B common.

Patting & Bowns' dividend pay-

Pattison & Bowns' dividend payments to Burns Brothers have always been shown with dividends from other investments, interest and miscellaneous earnings, so the possible reduc-tion in non-operating income ing from the sale of the interest in the company is not ascertainable. In the year ended March 31, 1925, this item amounted to \$299,280, a large part of which was derived from dividends paid by Lehigh & Wilkes-Barre Coal

21. of which was derived from dividends paid by Lehigh & Wilkes-Barre Coal Company.

This profit will increase Burns Brothers current assets, although the ratio to current liabilities at the close of the previous year was satisfactory. At the close of the previous year current assets of \$8,159,930 covered current liabilities of \$1,792,895 four and

one-half times.
The addition of \$1,150,000 through this transaction increased the ratio to 5.2 to 1. The item of "miscellaneous investments, mortgages, notes, advances and accounts, etc.." was reduced \$250,000 to \$1,879,245. 1000 Atl Gulf 5s. . . 68¼ 68¼ 68¼ 67¾ 4000 E Mass 5s B. . 67 67 67 67 2000 Hood Rub 7s 101½ 104½ 104½ 104¼ 4000 NE Tel 5s . . . 101% 101% 101% . . . 9000 Swift 5s . . . 100½ 100½ 100½ . .

with \$984,574 in the first quarter of 1925.

CANADA ENTERS ASSURED ERA OF PROSPERITY

Finance Minister Optimistic-Big Electric Power and Paper Expansion

OTTAWA, April 22 (Special)-Every assurance that Canada has entered upon an era of prosperity was contained in the budget speech presented in the budget speech presented in Parliament last week by Hon. J. A. Robb, Minister of Finance.

"The era of depression in this country has been overcome," he said. "All statistical compilations which mirror the year-to-year business of Canada prove it. The Dominion today is steadily growing more prosperous; there is less unemployment; the influx of settlers is growing; and with a hopeful sentiment manifesting itself throughout the country from coast to coast, the year 1926 is full of promise."

Dealing with the financial condition of the country, Mr Robb said: "Good crops, greater production at home, improved conditions and increased purchasing power enable me to present a financial statement as encouraging to Canadians as it must be gratifying to all interested in the progress and development of Canada.

"Throughout the year, imports of raw materials for Canadian industries have been well maintained, in a number of instances in excess of previous years; while from month to month during the year export trade increased, resulting in a steady growth of our favorable balance, which at the end of the fiscal year, March, 31, exceeded \$402,000,000.

"Nowhere are the results of this sented in Parliament last week by

\$402,000,000.

"Nowhere are the results of this growing trade more accurately reflected than in the increased earnings of Canadian railways and in the annual statements of Canadian financial institutions and industrial corporations."

Corporation Earnings Larger

"The actual ordinary revenues received up to and including March 31 last amounted to \$367,958,495. The estimated revenue yet to come, when the accounts for the year are finally closed, is \$8,841,505. This gives a total revenue of \$376,800,000, an increase of some \$29,965,520 over similar revenues for 1924-25."

An analysis of the newsprint indus-

revenues for 1924-25."

An analysis of the newsprint industry of Canada in the current monthly letter of the Royal Bank of Canada estimates that by the end of 1926 the Dominion will be producing fully one-third of the world's newsprint and 45 per cent of the raw material entering into newsprint manufacture. It is pointed out that Canada's program of expansion involves the installation of 18 new machines during the present year, providing for an increase of 1715 tons in daily capacity and bringing the 1926 production up to 1,750,000 tons, with a possibility of 2,000,000 tons production in 1927.

tons, with a possibility of 2,000,000 tons production in 1927.

The bank's review of the situation continues: "Canada produced 1.522,000 tons of newspring in 1925. Canadian pulp and pulpwood were used in 612,000 tons or 40 per cent of the newsprint manufactured in the United States, making a total of 2,134,000 tons, or 42.7 per cent of the world's estimated production coming directly or indirectly from Canadian sources.

"Allowing for the proposed new mills coming into operation, the world production in 1926 is estimated not to exceed 5,250,000 tons, of which Canada will produce 33.4 per cent, while her raw material will enter into 45 per cent of the total.

Industrial Outlook Brighter

Industrial Outlook Brighter

The industrial outlook in eastern Ontario is much brighter this spring than for a considerable time past. Car manufacturing plants are busy on orders from the Canadian Pacific Railway, and the Hydro-Electric Power Commission of Ontario. Automobile plants are also very busy. Foundries and structural shops in western Canada are finding extensions necessary to take care of the work offering.

Two important announcements regarding power development in the Dominion were made recently. One was that the Ontario Government had entered into an agreement for the delivery by the Gatineau Power Company at the Quebec-Ontario boundary near Ottawa, of from 230,000 to 260,000 horsepower of hydroelectric energy. The Gatineau Power Company is a subsidiary of the International Paper Company.

The other outstanding announces.

HUNGARY MOVES AHEAD RAPIDLY

Exports Increase in Five Years Twice as Fast as Imports

BUDAPEST, April 1 (Special Correspondence)—Nothing could indicate more strikingly the progress Hungary has made during the last five years than the figures relating to foreign trade given by the Commissioner-General of the League of Nations for Hungary, Jeremiah which was issued here recently.

This report, the twenty-second, nominally covers the calendar month of February, 1926, but extends its scope for the sake of comparison over recent years.

Imports exceeded exports in January, 1925, by 28,200,000 gold crowns, whereas provisional returns for the same month this year show a slight favorable balance, exports exceeding imports by 100,000 gold crowns. This remarkable improvement, however, follows directly in line with that

recorded ever since 1925. Taking, for example, an index number of 100 for imports and exports of the year 1920, then the imports and exports for the years 1920 to 1923, inclusive, were as follows: Imports, 100, 125, 129, 161, 168, 177; exports, 100, 153, 201, 206, 350, 426. these years has steadily improved, as suggested by the following statistics of the percentages of imports not covered by exports for the same

pre-war agricultural production."
The commercial agreement reached ter or sign, which depends upon the position of part of the electric equip-missioner-General with extreme satulation of trade between these states as a result of the agreement, and

Long Waiting Lines

Side by side with the scissors is a more recent phenomenon, the goods famine. Despite the high prices, the will also be reversed, so that the message will be written exactly as typed on the sender's first type-writer.

It is interesting to observe from Mr. Smith's report that Austria supplied 22.57 per cent of the imports into Hungary in 1925 and took 33.52 While the dispatch or telegram is per cent of Hungary's exports most cases far outruns the supply on its way from sender to receiver and leads to long waiting lines in the machines quite automatically front of the stores where objects of general consumption are sold. Soviet insoluble for everything the machines are sold. Soviet insoluble for everything the supply of the stores where objects of general consumption are sold. Soviet insoluble for everything the supply of general consumption are sold. Soviet insoluble for everybody else until the so that Austria and Czechoslovakia economists ascribe this goods famine machine of the receiver deciphers it together assume more than 50 per to the fact that the purchasing power for him. The official can write the cent of Hungary's business. Hence of the peasants has notably in- secret message in his office on his the importance of these commercial

Territories to the newly formed communications on the prairies. Dominion Government after compensating the Hudson's Bay Company for the loss of her rights in this almost \$200,000,000, and the gross territory by giving her certain grants of land and a cash consideration of approximately \$1,500,000. At that time this cash consideration was considered, by many people, to be a large one and the large areas of land received by the company had land received by the company had but little cash value.

This vast area was given over to issionaries and traders were, most of them, in a few small settlements the neighborhood of Old Fort Garry. Here the Municipal District of fre Garry. Here the Municipal District of Assiniboia had been formed in 1841 marking the beginning of self-government on the prairies. Other than this municipal district there was no form of government when the Territories were transferred to the Dotories were transferred to the Dotories were transferred to the Dotories and making it possible, has

The Manitoba Act of 1870 launched the old district of Assiniboia on an independent constitutional career and marked the birth of a new province in the west. In 1905 two other new provinces—Saskatchewan and North West Territories, and the tale of Canada's provinces became com-

in western Canadian development re-markable for its social, agricultural, economic, industrial and urban activity. A brief statement of a few alient features of this development may be of interest.

In 1859 Messrs. W. Caldwell and and the Rockies. Today, to fill its place, there are a dozen large dailies with modern equipment and large circulation and literally hundreds of

was expended in the prairie prov-inces to carry on the work begun in that small school half a century IS REMARKABLE

In that small school half a century previously. These provinces are justly proud of the progress made by their three growing universities, whose combined enrollment is now nearly 5000 students. Their elementary and secondary schools number over 11,000, and take care of almost 50,000 pupils.

OTTAWA, Ont. (Special Correspondence)—In 1869 the British Government transferred the control of Ruperts Land and The North West.

Ruperts Land and The North West 260,000 miles of roads take care of

Although not classed as manufacturing provinces, the capital in-

Urban growth can be realized only by those who knew the West 20 or the Indian, the fur trader and the buffalo, and its white inhabitants with her towns and cities today. In baffalo, and its white inhabitants were few in number, and leaving out 1871 the population of Winnipeg was were most 241, in 1921 it was 179,000. Regina has grown from a city of 2249 in 1901 to 34,432 in 1921, and Edmonton om 4176 to 58,821 in the same pe-

> been an agricultural development which has in a few short years made Canada the greatest exporter of wheat in the world. In 1901 her western wheat crop was 17,000,000 bushels: latest estimates place her 1925 crop at 420,000,000 bushels.

Production of creamery butter is of Canada's provinces became complete as we know it today.

New Era Opened Up

There are fewer farmers in the province of Manitoba than in either of her sister provinces, yet the eggs laid in 1925 by the hens in that province clone had a greater value larger in Ontario and Onebec the province alone had a greater value than the total cash consideration received by the Hudson's Bay Company from the British Government in 1869. from the British Government in 1869. output. The number of her beef cat-The building of the Canadian Paci-fic Railway through the prairies and there has been a steady advance marked the opening of a new era in the quality of all these products.

Future Achievements Foreseen Further achievements will easily outstrip past records as western development is but at the beginning of things. C. M. Schwab, the steel magnate, tells a tale of Andrew Car-In 1859 Messrs. W. Caldwell and W. Buckingham, two Toronto reporters, brought their outfit 650 miles across country from St. Paul, Minnesota, and established the first western newspaper, "The Nor Western" in a log hut outside the Fort Garry inclosure, on the east side of the main road of the Red River Settlement, now Main Street, Winninger, This was the first and. River Settlement, now Main Street, Winnipeg. This was the first and, for a decade, the only newspaper in Canada between the Great Lakes and the Rockies. Today, to fill its likely to require 1000 tons of rails a day. Mr. Schwab says he has seen the country take 20,000 tons a and even then the mills were insuffi-

RAIN from the American and in placing 11,353 tons of coal aboard Canadian wheat fields is reaching tidewater by Canadian routes 3 hours, 1 minute. This average 62.7 ing tidewater by Canadian routes 3 hours, 1 minute. This average 62.4 for export to an increasing extent, it is evident from the cargo figures of Great Lakes traffic for 1925, compiled by the bureau of research of the United States Shipping Board. The tonnage, which ran to as high as 4,400,000 tons n previous years, dropped to less than 500,000 in 1925.

These figures being based on the re-

ceipts at American ports, indicate that the grain, instead of moving through Buffalo, Erie, Toledo, or Fairthe Canadian Nationals.

through Buffalo, Erie, Toledo, or Fairport, O., is moving by the Canadian ports of Parry Sound, Port McNichol Depot Harbor and thence east via the Canadian Nationals.

This road, in turn, handles the grain eastward to Canadian tidewater ports for export. A reason ascribed for the dilversion of grain to the Canadian railinguistics of grain to the Canadian railinguistics of the Canadian tidewater ports in the Boston and the New York, will fill the run this season.

P. & O. Schedules

Changes in schedules of the Peninsular & Occidental Company have been port Line, a lake line owned by the National Railways. By offering these cheap rates by water, and operating the line at a deficit, it acquires a volthe line at a deficit, it acquires a vol-ume of rail traffic for movement east-ward which presumably offsets the op-erating loss incurred by the steamship line with feeds the railroad.

The total foreign tonnage handled over the lakes in 1925, which means the interchange with Canadian ports, amounted to 11,311,000 tons, a reduction of 1,900,000 from the previous year, or almost exactly equivalent to the reduced grain traffic. The lakes ton-

Transpacific tickets reading by way of the Canadan Pacific, the Toyo Kisen Kaisha (now consolidated with the Nippon Yusen Kaisha under the latter name) and the American Oriental Mail Line (now a component part of the Dollar Steamship Lines) are interchangeable, the Canadian Pacific announces. This applies to first class tickets only, at all ports.

Intercoastal Situation Despite the efforts of the ship operators in the United States intercoastal trade to keep their disagreements secret, it becomes increasingly evident from various sources that opinion is tending to the view that rate regulation is designable. Some ship operators

rom various sources that opinion is tending to the view that rate regulation is desirable. Some ship operators oppose the placing of the lines under jurisdiction of the Interstate Commerce Commission on the grounds that the latter, having long been associated with railroad work, would be inclined to favor the railroad standpoint in the controversy over water competition.

Even these operators, however, favor some kind of a regulatory body to fix water freight rates. At present, with recens slashes in rates by some lines, canned goods are handled as low as 30 cents a 100 pounds between New York and the coast. The rail rate is \$1.20 on lots of \$0,000 and \$1.45 on minimums of 40,000 pounds. With such a disparity, it is obvious the railroads get almost no westbound business, while it is also a reasonable assumption that the steamship lines, because of the rate-slashing wars which have caused such low water rates, are not making any profit on the trainc.

BOY 21 will pay for opportunity to work nd live on farm: house must have modern uprovements. STERN, 57 West 58th, New

"Then drop in on a few real estate dealers and see their "Oh, John!" she cried.

"And then," concluded the wise young man, "after we've had all the fun out of it, we can lease a small apartment and put our money into a nice new car."
"You are a dear," breathed the blushing bride.-Life.

"My neighbor struck a ledge of rock in excavating for a cellar.' "Yes, his lot certainly is a hard

HAVANA HOUSE GETS **NEW SUGAR MEASURE**

HAVANA, April 22 (AP)—A bill has been introduced in the House of Representatives which would authorize President Machado to set a date for commencement of cane cutting and provide penalties of \$5 for each sack of sugar produced by a mill in excess of the growers' plan of 90 per cent production this year. A fine of \$2000 would be imposed on a mill commencing operations before the date set by the President. Revenue derived from the fines DIAMONDS, pearls, bought for cash: cal would be applied to road construction. Are, as 43rd Sr., New York, Vanderbill 3083 MARYLAND

EDITORIALS

An interesting constitutional situation has recently arisen in New South Wales. In May of last year a Labor

An Australian Problem

Government came into power under J. T. Lang as Premier. It had only the very narrow major-ity of two in the Legislative Assembly numbering ninety members, and was in a consid-

erable minority in the Legislative Council, a body kept up to strength by nomination and numbering about seventy-five. None the less it proceeded to introduce and carry through the Legislative Assembly some very drastic legislation. Its acts included a law to make compulsory the forty-four-hour week for labor, a law giving compulsory preference to trade unionists and debarring a workman from obtaining employment unless he join the union prescribed for him by the Government, and a law depriving the railway and tramway employees who had remained loyal to the State during the strike of

1917 of the seniority they had then gained.

The opponents of the new Ministry alleged that only one of these proposals had figured in the program submitted by the Premier to the electorate, the forty-four-hour week. They also alleged that Mr. Lang during the election had asked the electorate only to consider the policy he had outlined, and had stated that if he was returned to power he would carry out that program, "No more and no less." Accordingly the Legislative Council, on which the opponents of the Ministry had a majority, when confronted with these laws for its assent, proceeded to reject them, as they had a constitutional right to do.

It was at this point that the constitutional crisis arose. Under the British Constitutional system the official head of the State is a Governor, appointed by the British Government with the consent of the Australian authorities, who discharges exactly the same kind of functions as are discharged by the King in Great Britain. That is to say, except in certain eventualities, he is the formal head, mainly charged with ceremonial and social duties, who has to act on the advice of the Prime Minister and his Cabinet in whose hands the executive power rests. In the last resort, however, he has certain important political responsibilities, for on the fall of a Ministry he has the duty of deciding which Parliamentary leader shall first be invited to try and form a new Ministry, and where he considers that the action of a Ministry is unconstitutional he can refuse to give his assent to proposed acts, a privilege which means that they can carry them only after they have consulted the electorate about them.

In this case as soon as the Legislative Council had rejected the far-reaching proposals of the Labor Ministry as outlined above, the Premier formally asked the Governor to appoint twentyfive new members to the Legislative Council, all of them pledged Labor men, in order to create within it a majority favorable to its legislation. Mr. Lang also announced that it was his intention to use the majority so created to abolish the Legislative Council altogether. Instantly there was a tremendous outcry. On the one side the opposition said that it was utterly unconstitutional for any Ministry to try to force the Governor to transform the political character of the upper house by adding a third to its members, for if it was entitled to do this it meant that the power of the upper house to discharge its primary function of protecting the community against an arbitrary despotism by a temporary lower house majority would disappear.

It also urged that for a very small majority to try to overcome the opposition of the upper house to the passage of legislation which had never been laid before the people, and still more its opposition to the carrying through of so vast a constitutional change as the abolition of the Second Chamber without first obtaining the approval of the people, was utterly unconstitutional and wrong. The Government, on the other hand, stood firm on the ground that a nominated House had no right to prevent a Ministry elected by the people from governing as it thought fit, and that the Governor, being a Constitutional Governor, was bound to act upon the advice of his constitutional advisers.

After a long controversy, the Governor-apparently on the advice of London-gave way and decided that if the Ministry persisted in demanding the creation of twenty-five new members of the Legislative Council, he had no option but to agree, though he did so under protest. But when the Ministry submitted to the Legislative Council a bill for abolishing itself the Council rebelled and threw it out. There for the moment the controversy rests. There would seem to be little doubt that Mr. Lang's Ministry tried to press its powers much too far. But it would seem to be no less true that in these democratic days the only safeguard which can be erected against the abuse of power by a majority in a lower house is to make the upper house also representative of the popular vote.

Distinct and gratifying progress toward removal of causes of friction between Mexico and

Progress in Mexican Affairs

the United States was disclosed in the voluminous correspondence covering five months carried on between the two governments and just made public by mutual agreement in Washington. This discussion

involved the application of Mexico's new petro-leum and anti-alien land laws to American nationals. There were ten notes in the exchanges and they contained many thousands of words. It may seem regrettable that it should require so much time and so many words to clear up the situation between the two neighboring nations, but with real progress attained toward amicable adjustment of their differences the time taken and the words used are far from wasted. Indeed, on the contrary, they are vastly better than years of war and millions of bullets that

might otherwise have been expended.

More correspondence will probably be needed on minor points still in doubt, but the entirely.

friendly tone and the reasonable attitude displayed thus far on both sides indicate that, with the vital elements of the discussion cleared up, ultimate peaceful settlement of the troublesome questions involved is in sight and will be enduring. The chief clarification accomplished in this correspondence is the agreement that title to oil lands acquired legally by American nationals before the adoption of the Mexican Constitution of 1917 shall be confirmed with fifty-year concessions that can be extended and will not be subject to retroactive effects of the Mexican nationalization of subsoil resources.

The regulations that are to govern the enforcement of the petroleum laws are yet to be received in Washington, but the correspondence just published contains oft-repeated assurances by the Mexican foreign office that these regulations will "conform to the principles of interna-tional law, justice and equity." Without doubt these assurances will be fulfilled, especially if the American Government and American citizens maintain their present policy of reasonableness and patience and do not commit or countenance acts that will tempt the Mexican authorities to change their attitude.

The negotiations between the two countries have reached a level of amity, forbearance and good will at which they should be kept with the utmost firmness by the Washington Administration. If this can be done, it will be impossible for Americans who have hoped to get the help of United States fleets and armies to protect and confirm "rights" improperly or fraudulently acquired to accomplish their purpose. It will mean the end forever of the exasperating, recurring "scares" over mythical Japanese concessions in Mexico and stop for all time the unfriendly and dangerous help so often given from the United States to the instigators of strife south of the Rio Grande. It will mean that the people of the United States will help rather than hinder Mexico in solving its problems of civilized progress that are more perplexing and difficult than it is possible for Americans to appreciate.

The millions of Mexicans, consisting chiefly of descendants of Toltecs, Mayas and Aztecs, with a liberal admixture of African and Asiatic racial elements, and with only two men in a hundred belonging to the white race, exploited as they were for 300 years by Spain, have been struggling since the Republic was established to climb out of the strange feudal system of society and government imposed by the Spanish conquerors and modified by the peculiar local conditions. The fact that they have made such progress as they have attained is the thing to cause wonder, and not the fact that they are "backward" now.

What they need from their more fortunate neighbors at the north is a plenitude of fairness. forbearance and understanding-not the imposition of more difficulties on top of those they already have to meet.

Assurance is felt by the proponents of plans to extend federal aid, in some form, to the agri-

Farm Aid Program Clarified

cultural industry in the United States that the announcement by President Coolidge that he is in favor of providing government loans to farmers' co-operative associations will make possible the passage, at

the present session of Congress, of a relief measure along the line followed by the pending bill introduced by Representative Tincher of Kansas. The proposed plan, it is explained, avoids the objectionable feature of price-fixing, and therefore the President, in indorsing it, has taken no attitude in conflict with his previously expressed views. He has not previously, so far as known, officially approved the plan of Government loans to co-operative associations, indirectly. It is said to be his understanding that these advances from an established revolving fund would be regularly returned as the needs were met, to be used again and again for similar purposes.

It is not certain, it seems, that this quite generous provision would entirely satisfy those farm organizations which have insisted upon what is referred to as "the equalization plan," the chief feature of which is that some board or commission, to be financed by the public, be set up to buy certain surplus crops and sell them abroad at prices less than those charged at home, distributing the loss on the produce sold abroad proportionately, each farmer who benefits by the completed operation paying his

It is explained by the "spokesman for the President" that the Chief Executive regards the proposal in the Tincher Bill for the making of government loans to farmers' co-operatives for marketing purposes as a continuance of the policy followed by the War Finance Corporation during the last war. It is as reasonable, he believes, to make loans to organized farmers' co-operatives as to make loans to the railroads in time of financial and industrial stress.

However worthy the purpose of such a measure as that proposed, it is absolutely necessary that the acid test be applied to it. Without prejudice and without favoritism, it must be decided, before the policy is adopted and before it can be publicly approved, that an emergency exists. Unless the benefits which are expected to accrue from special aid or protection extended to even so important an industry as agriculture are to be shared, more than theoretically, by the people of the country generally, it would be difficult to defend the plan upon a logical basis. Does an actual emergency exist? Are the processes of cooperative marketing, which in this case clearly refer only to co-operative selling, to be applied for the benefit of both producers and consumers, or only for the benefit of the producers?

Fortunately, of unfortunately, it is indicated that the plan most desired contemplates the marketing of American surplus crops in foreign countries at prices lower than those charged to consumers in the home markets. The American consumer may feel it pertinent to inquire what proportion of the total yield of the farms. ranches, plantations, orchards, gardens and dairies is to be regarded as "surplus" if the purpose is to penalize him for buying in the home market while offering a premium to the ustomer in Europe, Canada, or South America. He has discovered, by present-day experience.

that it is possible for the producers or cornerers of farm produce, such as potatoes, to exact an unfair price in times of artificial shortage. Can it be claimed that any measure which, in fact or in theory, imposes a tax upon the consumer to provide funds which will enable the producer to create an artificial shortage in the natural supply would be just or equitable?

There is general agreement that the problem of the farmers is a serious and pressing one. But it may be that the millions of consumers who are not farmers, but who are the producers of other essential commodities, must still be convinced that an actual emergency in fact exists, sufficiently acute to justify a resort to remedies more or less paternalistic in their

There need, necessarily, be no unanimity of opinion among those comprising the Rev. Dr.

Freedom

of Speech

in

the Pulpit

Cadman's audiences, visible and invisible, regarding his ability, or lack of ability, to expound knowledge undefiled in answer to the various queries directed to him, to insure practically unanimous onin-

ion regarding the impropriety of subjecting him to the inexcusable rudeness perpetuated recently by wearers of American military uniforms. If the flag which these impolite citizens profess to defend stands for one thing more than another, that thing is liberty-liberty of action within due bounds, and liberty of conscience without bounds. Conceding that the reverend gentleman referred to, although speaking from the platform of the Y. M. C. A. building where he has held meetings on Sunday afternoons for some years, was to all intents and purposes enjoying the traditional protection and privilege of the pulpit, there has been assured to him that freedom of speech which it ill befits even the most militant soldier to assail or question.

It is true, of course, that the speaker mentioned has invited all who choose to submit questions which they may desire him to answer in these particular meetings. But the manner of such interrogation has also been specifically indicated. The occasion is not one for open debate. Discussion pro and con would be, under the circumstances, as impossible and as futile as an open debate during a Sunday service upon the soundness or correctness of the theology of the preacher. Those who attend in response to the implied invitation are expected to listen and possess their souls with patience.

The persistent critics of Dr. Cadman who resorted to what at least may be termed unparliamentary practices, attempted to controvert the speaker's expressed views regarding the wisdom and propriety of maintaining the reserve officers' training camps and thereby 'encouraging belief in violence as the final resort in international differences." The subject under discussion was "Disarmament and World Peace." Dr. Cadman, it is explained, declared that he was not "an out and out pacifist," but his address was, unquestionably, a direct attack upon the army reserve system and the introduction of military training in high schools, universities, and other institutions of learning.

But it is not the subject of his remarks, or even the manner of their delivery, that is to be considered. Even though he had declared himself an out and out pacifist he was entitled to that courteous hearing which a common regard for the proprieties accords to those of his cloth and station.

The propaganda of militarism is broadcast daily, in the press, on the air, in the schools, and in the camps. The privilege of free speech, free use of the postal service, and free use of public funds, is not denied by those who conscientiously proclaim the doctrines of peace and brotherhood. There seem to be two distinct and divergent efforts to direct public thought regarding peace and war. Politely these may be referred to as campaigns of education. The right of all who feel moved to preach or to teach in these different schools must remain unquestioned. If a great moral question is involved, it can be met and the problem solved only as the American people have found it possible to meet and solve their problems in the

Editorial Notes

Really, fairness almost demands that the movement being sponsored by the trades and labor council of Victoria, B. C., to secure the appointment of a crown defender in Canadian courts, as well as a crown prosecutor, should meet with success. This council, which represents all branches of organized labor, is planning to ask other Canadian labor organizations to support its demand that in serious cases poor prisoners shall be accorded the services of an experienced and able lawyer, instead of having to rely upon some young and inexperienced one appointed by the court in each individual case. At present, the labor body claims, indigent prisoners charged with serious offenses almost always are defended by an inexperienced lawyer, while one of the most skilled lawyers in the profession prosecutes them. The aim of the crown, it is contended, and justifiably, it would seem, should be to enforce strict justice, and not merely to secure convictions.

Good for the girls of today, and good for Miss Sarah Louise Arnold, national president of the Girl Scouts! For the latter has given it emphatically as her opinion, in St. Louis, in connection with the Girl Scouts national convention being held there, that the modern girl is headed the right way. In thus absolving her of the "flaming youth" charges which have frequently been made against her in the past, Miss Arnold declared that the modern girl has a whole-heartedness for wholesome, square and bighearted things. And she lays the responsibility just where it belongs, when she asked the question, "What has become of the mothers and fathers?" a question which she answered in part: "We act as though the boy and girl were responsible for conditions today, when as a matter of fact we are all responsible together."

Museums as Modern Temples

By Alfred C. Burrill, Curator of the Missouri Resources Museum

tions which are, in a way, giving to it the place of the The thought arose in considering the question, What is the white race doing to pass on to future ages the best of the present-day natural science, art, literature and history? To review the historical aspect first, it is well known that the ruler's palace, or a religious temple of old, was the center of culture-literature, art and primitive science. The best of this knowledge and of these historical high spots were built into temple structures or carved upon them.

These stone records of old surpass the records of today, both by reason of the enormous size of the sculptures, statues and interior frescoes (perhaps so bulky that conquering enemies might not be able to carry them off as booty), and by reason of the fact that, being reared on solid platforms, hills and massive walls, though they might crumble, they were too solid to disappear; and though they might be attacked with catapults and sappers, they would not be smashed up easily by hostile invaders. This was, of course, before the days of dynamite and modern guns.

Temples and palaces were at times interchangeable, or housed in one building plan. Where religious head and ruler centered in one individual, temple and palace were one, as in the cities of the ancient Mayas of Central America. These prove the chief remaining source of lore about them, and from their stone wall reliefs we read of their great men, wars, games, customs and historical deeds.

In contrast, American civilization makes records mostly perishable. Americans have been too busy pioneering The houses no longer last a century; in fact, most of the present-day books and pamphlets will hardly last that long, where wood pulp paper is the base. If floods or dust storms should cover things over as they did many ancient centers of culture, the iron structures and much brick and cheap cement would disintegrate before the first thousand years had passed. Only a very few public buildings, statues and larger roadways would endure to 4000 years, as the work of the Egyptians and others has done, although, of course, the moisture in America would be partly responsible for their disintegration.

Because of this prospect that the present civilization will hardly leave much of worth behind it, it is a duty and not a mere luxury for the people to pay publicly for some of this enduring work. Missouri, through its Decoration Commission and Building Commission, has done well in its new State Capitol.

Only a few museums of arts and natural sciences, and fewer libraries in America, have tried to build nearly as well. More than any modern church or commercially constructed school or university building cluster, the so-called temples of learning, these big public buildings are serving for temples, such as anciently used, in which to display carvings, statues and art of the more costly and perfect

These are the records which future ages can find and treasure. Great public collections of those things not easily portrayed in stone should fill them, as it is hoped will be the case in the Missouri State Museum in the Capitol building. Many more bronze tablets, to take the place of destructible books, papers and pamphlets, should adorn them than is the case at present.

Could the Scriptures have been originally written in clay

The Missouri State Museum, like some others, has func- | tablets, as the Babylonians wrote their real estate and tax transactions, instead of being copied over and over by scribes, we would have had no particle of doubt about the original wording, and could proceed at once to the intended meaning in modern language. As it is, no one knows exactly what that meaning is in many instances, nor is any scholar likely to find out, since all of the New Testament texts with which comparison can be made are copies not much closer than 100 years from the time of Jesus of Nazareth. As for the Old Testament, we are still further away from the originals.

+ + + It is evident that the great mass of the books and papers of today cannot be constantly reprinted and reissue cheap paper, and that only the gist of the best of them will be passed along. Shall we leave it to the future to select what is best out of the discard, or shall we preserve for ourselves that which we judge best? It is better that these great public buildings should be adorned as our temples, the great museums of record of our people, to show what they used and with what they worked. In this sense, stop-gap exhibits should be thrown out for

more permanent interests, statues and concrete affairs. It is this ideal toward which the Missouri Museum hopes to work, and to this end it is aiming to secure a lasting record of the Indian, Spaniard, Frenchman and the later colonizers, with their resources. Like the farmer, we prefer stone posts to wooden, as thereby a gain in permanence is made. So we have begun with mineral resources and Indian Stone Age exhibits in preference to perishable forest products and agricultural grains and

Quality exhibits come slowly. New and better ideas than hitherto employed as to methods of display are scarce. What permanently compels the interest of the visitor is dimly guessed. The Missouri Museum is a process of long-continued efforts to gather the best. Min erals keep better than grain, as much expense is required to process fruit and fossilize grain. The value of these latter as a permanent show is, indeed, in doubt, due to changing crop fads.

Some do not know that the ancients also had museums of a kind. In the caverns under the hills of Malta Island, in the Mediterranean, the Knights of St. John (whence the Masonic Commandery of today) preserved certain things in artistic arrays. But more ancient than the Middle Ages, in the same caverns, hewn even in porphyry with flint tools, Stone Age men, before or just after the Ice Age, put red ocher scrolls on the ceilings and carved huge stones and altars in phallic symbols. On the European mainland, n Spain and France, a little later-say 6000 to 20,000 B. C.—men drew wild animals on the walls and modeled clay images, which answered for their museums.

Likewise in America the Aztees, in the early Middle Ages, built a great aviary wherein were kept all manner of American wild birds, requiring 300 attendants for their care. In a separate stone building or zoo were housed great numbers of snakes and wild animals, requiring many keepers, according to Prescott's "Conquest of Mexico. One of the Greek authors tells of an emperor giving

he whole army orders to collect every kind of creature Will Americans do better, and will they make what

they do more lasting?

The World's Great Capitals: The Week in Rome

Development and innovation is the cry now heard on all sides. The towns of Italy, large and small, are the prev of ambitious architects, who vie with one another in submitting to the local authorities schemes to modernize cities, plans of extensive improvements which are to turn Italy into the most modern country in the world. After Rome, Milan and Venice, to mention just a few of the most important towns of Italy to which attention has lately been drawn, comes the turn of Florence. A distinguished architect; Signor Coppede, proposed to construct an imposing structure in the very heart of Florence, with glass-covered streets, surrounded by an imposing arcade. The plan was warmly approved by the Municipal Council of Florence, and it was already decided to name this new lleria" after Muss

The scheme required the demolition of a few old uninteresting houses, which have no artistic value except for their moss-covered walls and old-fashioned balconies and windows, but this was sufficient to give rise to an outcry of protest. Gabriele d'Annunzio joined in at the right moment, and in a scathing letter to the editor of the Corriere della Sera, he described in a picturesque style his horror at the "terrible contamination which threatens Florence." He would never touch again the soil of Florence, D'Annunzio indignantly threatened, and he would not rest until the "shameful" project would be put aside. The lyrical invective produced so great an impression that Signor Mussolini himself had to intervene in the curious dispute, and in an urgent telegram the Duce assured the poet that he would allow no vandal hands to pull down house or wall in the shadow of which Dante had walked.

The Roman Forum is continually yielding its treasures. and the latest addition to the Museum of the Capitol is a fragment of the Fasti Triumphales, which, together with the other fragment of the Fasti Consulares found about

I two months ago in the courtyard of a private palace, helps us to clear up some uncertain points of ancient Roman history. The Fasti Triumphales contained a list in chronological order of persons who had obtained a triumph, together with the name of the conquered people. The fragment now found contains indications of the triumphs of the consuls M. Aemilius and Mucius Scaevola for the victories over the Ligurians of 175 B.C. and of that of the pro-Consul Appius Claudius for his victories in Spain a year later. In the Capitoline Museum there are preserved about forty fragments of the Fasti Triumphales discovered in the Roman Forum in 1546, on the exact spot where they were originally engraved on the outer wall of the Regia, the official residence of the Pontifex Maximus. The possession of the latest fragment is important because on account of the loss of Livy's books dealing with that period of Roman history, had been made as regards the names of the consuls that governed at that time.

A film which is attracting thousands of spectators is now being shown in the picture theaters of Italy. It is just a review of the various activities of Signor Mussolini as head of the Government, as minister of the fighting services and as chief of the Fascist Party. The Italian Premier is first presented in his study room at the Foreign Office (the Palazzo Chigi) and is seen in the act of signing a trade agreement with the representatives of a great power. He is then shown reviewing the garrison of Rome. inspecting sailors on board a battleship, testing a new hydroplane, driving his own car and taking his daily ride in the Borghese gardens. Signor Mussolini is at his best when he is in the midst of his faithful Black Shirts, and here his energetic gesture and his ready smile show that he is in congenial surroundings. Throughout the entire showing the spectators stand up, owing to the continuous playing of Fascist songs.

Letters to the Editor

Brief communications are welcomed, but the editor must remain sole judge of their suitability, and he does not undertake to hold himself or this newspaper responsible for the facts or opinions presented. Anonymous letters are destroyed unread.

Let the People Decide on Peace or War In view of the acknowledged importance of the problem of the prevention of war or the minimizing

of its possibility, the following communication from a diplomatic attaché at Washington is presented as of more than usual interest and value. The writer has given much study to the subject and is well qualified to discuss it. No responsibility, however, is assumed for the views expressed, and they are submitted merely as a basis for discussion and in no way as an expression of the attitude of the paper.

To the Editor of THE CHRISTIAN SCIENCE MONITOR: The Great War has strengthened the world-wide feeling that war ought to be restricted and, if possible, ultimately outlawed.

The League of Nations and the subsequent treaties adopted or discussed were intended to promote this idea. The last years have proved, however, that the gap between the conditions as existing before the World War and the realization of the durable peace ideal is too wide to be filled at once.

Prominent men have put forward the question whether the decision on a declaration of war ought not to be given to the peoples of the nations themselves. Under the actual circumstances, however, no single country could undertake to give, by national legislation, to the people the ultimate decision on peace or war. It is clear that such a unilateral provision would unavoidably create a very undesirable and dangerous situation for the country concerned whenever it was engaged in a controversy with a nation which had not inserted in its national legislation a similar stipulation.

The only way to overcome this drawback seems, therefore, to be by an international agreement covering such an arrangement which would put all the contracting powers on the same footing in this respect. This treaty, moreover, should neither interfere with the present negotiations concerning international questions now being cussed nor tend to bring about a solution of these problems. The main requirements in such a treaty are six in number.

1. The agreement, as mentioned above, could, first of all, obligate the members of the family of nations to insert in their constitutions or legislative systems a provision according to which no war should be declared by any nation except by nation-wide and secret referendum vote

of the entire adult citizenship of both sexes. 2. The agreement should clearly and explicitly define conditions under which resort should be had to a referendum, as, for instance, if there should be a rupture of diplomatic relations or the delivery of an ultimatum.

3. In order to avoid the condition where a country by holding an earlier ballot, could upset international tranquillity, clauses could be included requiring a period of delay during which no referendum could take place.

4. Contracting powers could undertake to provide by national law that neither the civil nor the military authorities could prosecute anyone who had refused, previous to the referendum, to comply with a mobilization order or

to partake in any other act of war. 5. Distinction should be made between a mobilization with an international tendency and a mobilization for internal reasons, and it need hardly be mentioned that an international agreement should not act as a restriction upon mobilization for a maintenance of internal order.

(In this connection it should be agreed that notice should be given to some duly constituted and properly qualified international bureau in case of any mobilization, whether general or partial, for internal reasons.)

6. The powers should obligate themselves to provide by national law that no legal procedure could be taken against anyone who has refused to comply with a mobilization order which had not been reported as provided in para-

An agreement such as the one roughly sketched in the preceding six paragraphs would, on the one hand, not interfere in the least with any future endeavor to promote durable international peace by means of other machinery, while at the same time it would tend to curtail the danger of war by giving the decision on issues of peace or war to those who must fight the battles and make sacrifices. DIPLOMATIST Washington, D. C.
